The Leading Conference & Exhibition FOR THE PETROCHEMICAL SUPPLY CHAIN & LOGISTICS INDUSTRY

The Petrochemical Supply Chain & Logistics Conference & Exhibition is positioned at the forefront of the booming Petrochemical industry in North America. This industry leading event is regarded as the most significant meeting place for supply chain & logistics professionals, where they meet to do business.

The Petchem Supply Chain convention has fast become a next generation energy event, hosting major Integrated and independent Petrochemical companies, Rail providers, global shippers, trucking & 3pl's, barge, ports and innovative technology providers, and service companies all of whom play an active role in the global Petrochemical Supply Chain industry.

The 2018 conference will see more global business leader dialogue sessions and strategic panel sessions, alongside in-depth workshops that will highlight and address the most pressing industry challenges, new technologies and industry developments that will shape the petrochemical supply chain industry landscape for decades to come.

Global Logistics Category
Group Manager,
Chevron

ADDRESSING THESE KEY CHALLENGES:

Domestic Transit Reliability and Consistency:

Guarantee the route your product takes to market has the capacity and efficiency to get it there on time as promised.

Technology Road-map to Optimisation:

Proven strategies and real-life examples of how digitisation, automation and block chain can add value to your supply chain.

The Export Gold Rush:

Considerations and strategies being taken to reduce bottle necks and ensure your product is taking the most optimal route to market- wherever its destination may be!

Ensure 20/20 Vision of Your Supply Chain:

Hear from key players and how their efforts to collaborate with each other is creating better visibility in supply chain.

KEY SESSIONS FOR 2018 INCLUDE:

Producer Fireside Chat- Supply Chain Needs in 2019 and Beyond

- Hear from key industry players about the volumes coming online and what the immediate supply chain implications.
- Develop a better understanding of producers needs from the supply chain community- immediate and looking ahead.
- Understand a producer's view of the supply chain and their key concerns

Advancing Your Capabilities Toward a Digital Supply Network: What Will be your Road Map?

- Master the art of developing an action plan in the new era of digitalization to ensure you aren't left behind
- Get the facts on what does digitalization, its implications, challenges and opportunities really mean for the petrochemical supply chain in terms of operational efficiency
- Hear from leading experts on Blockchain real talk- what it means and how can it add value

Transformative integrated water resources infrastructure management on America's Energy Coast

- Hear from US Army Corp of Engineers on the latest studies and projects, both ongoing and budgeted, for watershed flood risk management, coastal storm risk management, ecosystem restoration, and navigation
- Understand how these changes will help to protect the energy industries from future flood risks and will support a vibrant economy, resilient communities, and healthy coastal ecosystems for generations to come

Strictly Business- Optimization of Supply Chain Year on Year

- Get the facts on how well the petrochemical supply chain is coping with increased volumes so far.
- Adapting to the new Geopolitical Landscape: ramification of recent "America-First" events on supply chain strategy and needs for agility
- Hear from the ultimate authority on what more must be done, and quickly, to support current petrochemical export volumes. What does the future hold, and must we act now?
