Informatica Cloud Foundation

Overview

Our **Informatica Cloud Foundation** engagement allows you to directly leverage eVerge Group's expertise to help guide you through the Informatica Cloud development process while learning best practices for design, development, testing and deployment of Informatica Cloud tasks. An eVerge Senior Consultant will use Informatica's Velocity methodology combined with our own real-world experience and best practices to help lay the groundwork for best-in-class cloud data integration solutions across your enterprise. The Informatica Cloud Foundation engagement is specifically designed to help clients design, build and deploy their first Informatica Cloud data integration task.

Key Engagement Deliverables

- Cloud integration "Use Case Planning" Workshop
    - Identify Sources / Targets
    - Define integration requirements
    - Discuss data dependencies / data issues
    - Prioritize integration use cases
- Setup of Informatica Cloud Secure Agent(s) in client environment
- Configuration of Cloud Connections – Source and Target
- "Design to Deployment" Workshop - Consultant will demonstrate all general phases of an Informatica Cloud development lifecycle. Activities conducted during this workshop will include:
    - General design considerations with Informatica Cloud
    - Sample Informatica Cloud mapping development
    - Various options around implementing complex mapping logic
    - Cloud integration process design
    - Testing and Troubleshooting
- Standard Informatica Cloud scheduling options for cloud tasks
- Introduction to potential custom error handling strategies for cloud tasks
- Proposed approach for next steps and future cloud integration recommendations

Engagement Assumptions

To ensure the most effective utilization of the eVerge consulting resource, the prerequisites below should be completed by the client prior to the commencement of the engagement. The eVerge consultant will be available for one pre-project call for planning and to answer any questions that client might have regarding these prerequisites.

Engagement Benefits

- Jumpstart your Informatica Cloud data integration development with one-on-one consulting from our Cloud integration experts

- Leverage our 10+ years of experience with Informatica implementations for data integration best practices

- Thorough knowledge transfer around data integration development for rapid and effective utilization of Informatica Cloud

Typical Duration

- 1 Week

eVerge Resources

- Senior Consultant

informatica
Authorized Business Partner

- Subscribe to Informatica Cloud
- Ensure availability of appropriate server(s) to run the Secure Agent(s)
- Identify and confirm the availability of Informatica Cloud Administrator(s) and Developer(s) during the engagement
- Complete the Informatica Cloud basic training course
- Identify development environment to support build activities for source and target systems
- Customer may choose one cloud data integration task (medium complexity) for this engagement and in such case, customer will have already performed low level mapping design between source and target data
- Source and Target connections must be native cloud connectors or Informatica Cloud Labs certified connectors (custom connectors will not be built as part of this engagement)
- eVerge will test any cloud task that is built as part of this engagement. Client will be responsible for any functional testing and final QA testing for such tasks before running the task in a production environment.

About eVerge Group

Founded in 1993 and based in Dallas, eVerge Group is an award-winning technology consulting firm. Our experts refine business processes and deliver services tailored for commercial and public sector clients. We partner with Informatica, Oracle and Salesforce around five major areas of expertise including Business Intelligence, Customer Experience, Enterprise Information Management, Enterprise Resource Planning and Human Capital Management.

Our Enterprise Information Management Practice is directly focused on our Informatica Partnership and data management opportunities across the Informatica Platform addressing Extended Enterprise Data Integration (On Premise | Cloud | B2B), Data Quality and Data Governance, Information Lifecycle Management and Master Data Management.
