

Plantronics + Avaya®

Five Advantages for Customers

1. OVER FOUR DECADES OF PARTNERSHIP

A DevConnect "Technology Partner," the highest developer partnership level
 Plantronics provides certified compatibility across Avaya enterprise and mid-market product lines, including emerging forms of collaboration like video.

2. SEAMLESS COMPATIBILITY

Plug and Play Bolsters User Confidence and Adoption of UC
 Plantronics Hub™ client software offers Avaya customers the ability to answer and end calls remotely from desktop phones, soft phones, and Bluetooth® devices. Working with Avaya, Plantronics has also designed custom interface cables that cover the headset connection for all Avaya phones—literally dozens of models.

3. UNIFY ALL YOUR DEVICES WITH WEARABLE TECHNOLOGY FROM PLANTRONICS

Simplify the User Experience
 Many UC applications run on multiple host devices—desk phone, PC, tablet, and mobile alike—each with its own unique use case. The Plantronics Voyager Legend® UC eliminates complexity by blending easy access to communications and applications via a single and common user interface.

4. PLANTRONICS CONTEXTUAL INTELLIGENCE INTEGRATION

Smart Lock-Seamless Transfer Applications—and more to come
 Combining Plantronics' "contextually aware" sensor-based headsets and Avaya's new Engagement Development Platform creates a unique opportunity for businesses to truly maximize efficiency, improve workflows, and gain deeper process integration. Developers can leverage information including a headset user's wearing status, identity, presence, and proximity to create apps for next-generation, context-aware wearable technologies.

5. GET AHEAD AND GET STARTED WITH A UC DEPLOYMENT PROGRAM AND BEST PRACTICES

A no-risk opportunity to evaluate and incorporate audio devices into UC pilots and deployments
 With Proof of Concept programs such as Get AHEAD, Get Started and the UC Toolkit—an online portfolio of best practices, IT tools, and user training resources for UC audio device deployments—customers can be assured they will get the most from their Avaya + Plantronics investments.
 Visit plantronics.com/getahead, plantronics.com/getstarted and plantronics.com/uctoolkit for more information.

Dynamic collaboration.
 Intuitive communication.
