

Migrating to New Technology for Customers in Education

Provide connection, mobility, and engagement while keeping your campus safe.

Transforming Education with Loyalty2gether

From elementary schools to universities, educational institutions of all kinds are addressing new challenges with new communication capabilities.

Students of all ages are better connected than ever. Smartphones and Internet give children and adult learners instant access to information that prior generations could only dream of – challenging educators to compete for students' attention and engage their creativity. Unified communication capabilities, conferencing services and video collaboration open a door to a higher level of engagement.

Campus security is also a high operational priority for every institution. Acts of violence, big and small, are attempted too frequently at schools of every level. All locations need instant access to security services, from kindergarten classrooms to university parking lots.

Meanwhile, elementary and secondary schools set a priority on keeping parents well-informed about everything from classroom activities and special programs to the status of their kids' school bus – keeping a channel open in case of emergency.

Loyalty2gether allows customers to increase their business value and move faster while minimizing migration disruption along with unprecedented incentives to move to the latest technology whether on your premise or in the cloud.

8 of the top 10 colleges in the U.S. are running Avaya solutions.

Avaya currently has very attractive promotions to support migration from legacy systems such as the CS1000 to current technology, be sure to ask your Avaya account manager or business partner or visit [Avaya.com/Upgrade](https://www.avaya.com/Upgrade)

K-12 Parental Engagement

Distribute information to parents, students, and staff.

One of the biggest factors in child education is parental involvement, and parents on busy schedules are looking for ways to engage. Avaya Proactive Outreach Manager allows organizations to automatically send alerts by email, SMS text or voice for critical and routine announcements. Integration and customization with Avaya Breeze opens a world of opportunities, from automated scheduling of parent-teacher meetings to helping parents keep track of the bus ride home.

Campus Security

Be prepared for anything.

Security starts with providing campus-wide communication tools to staff and students. There are so many possibilities: Configure E911 data on your private and wireless networks so first responders can always find your people. Deploy kiosks to the dark and lonely places, giving students a lifeline against stalkers. Reach school personnel on any device, anywhere.

Multi-Campus, Multi-Modal, Multi-Capable

Help diverse academic users connect and learn together.

A modern campus of any size plays host to a variety of users and use cases. Replacing an old, end-of-service phone system with current Avaya technology opens the door to more learning possibilities: Smartphone-era students get integrated communication capabilities that help them learn. People get connected with cloud and mobile apps. HD video conferencing erases distance for administration and classwork. With Avaya Breeze and a community of DevConnect developers, the possibilities exceed your imagination.

About Avaya

Businesses are built on the experiences they provide and every day millions of those experiences are built by Avaya (NYSE:AVYA). For over one hundred years, we've enabled organizations around the globe to win—by creating intelligent communications experiences for customers and employees. Avaya builds open, converged and innovative solutions to enhance and simplify communications and collaboration—in the cloud, on premise, or a hybrid of both. To grow your business, we're committed to innovation, partnership, and a relentless focus on what's next. We're the technology company you trust to help you deliver Experiences that Matter.
