8g x 50mm  
Trim Head

### REVOLUTIONARY PROTECTION & DRILLING PERFORMANCE

B8™ Coating lasts up to 4 times longer than conventional galvanising providing a superior looking finish at an economical price.

**Drills Faster, Lasts Longer!**

## Narrow Board Decking

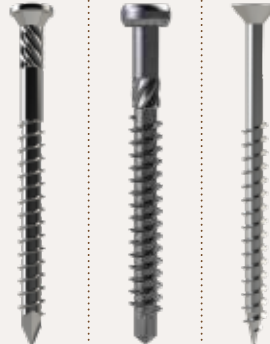

Use narrow board decking in smaller areas to create an illusion of greater space and detail. This contemporary approach is most common in BBQ areas.

**SS304**

## SHARKS TOOTH

With B8™ Coating and a Hi-Low thread, the Sharks Tooth™ Bugle is the Tradies choice for faster drilling & superior holding power.

## Sharks Tooth Decking

After extensive testing and development we are proud to release our new Sharks Tooth™ Decking Screw. Use the Sharks Tooth™ Decking Screws in narrow decking boards. This screw is for timber to timber applications. The truss head provides a clean, flush finish.

**Specifically designed** for fastening hardwood decking to softwood joists.

**Minimise the need to pre-drill\*** Let the spear point do the work for you.

**With our revolutionary Sharks Tooth™ thread**, installation is fast, with an impressive finish around the head.

**The Torx\* drive recess** provides positive bit engagement for efficient, no fuss installation.

Available in **Stainless Steel**.

**TRUSS HEAD for a  
perfect flush finish**

**Sharks Tooth Thread for  
SUPERIOR DRILL SPEED**

**SWARF CHANNEL  
to remove sawdust**

**SPEAR POINT for  
precision pre-drilling**

**SS304**
