US Offshore Wind ConfEx

July 18-19, 2022 | Boston, USA

REGISTER TODAY

Welcome to the largest US Offshore Wind Community

The Premier event for Offshore Wind executives

Who should attend and what are the benefits?

Reuters Events US Offshore Wind 2022 is America's largest information and networking hub for businesses that are looking to invest, find partners and secure contracts in multi-billion dollar US offshore wind projects. Moreover, the conference has become the world stage for industry-defining policy updates on US OCS leasing and permitting activity.

There's something specific for everyone!

ARE YOU A PROJECT DEVELOPER, INVESTOR OR ADVISOR?

Evaluate the market conditions and potential risks you face on a federal, state and national level to inform crucial decisions about project partnerships and development opportunities in key coastal states.

Assess supply chain, workforce capabilities and infrastructure progress on the east coast so you can assemble the partners and supply contractors you need to deliver reliable projects, on time and within budget.

Analyze US subsidy schemes and tax regimes and the implications for financing and your bottom line.

ARE YOU A CONTRACTOR, SERVICE PROVIDER OR SUPPLIER?

Understand what developers require in terms of a supply chain, along with projected project timelines and when and where you can become a preferred project partner.

Demonstrate how your technologies and capabilities can reduce project capital costs and support the pipeline of existing and future projects i.e., vessel capabilities, foundation options, installation models, turbine selection, O&M etc.

Network with up to 10,000 potential industry leaders to make the right connections and seize the exciting new commercial opportunities in US offshore wind.

ARE YOU A NEW MARKET ENTRANT TRANSITIONING INTO THE OFFSHORE WIND SUPPLY CHAIN?

Review upcoming projects and commercial opportunities against your capabilities so you can diversify into the offshore wind sector. Anticipate the size of market and how to tender to developers; and understand the layers of the supply chain, how you fit in and who your customers are.

Identify Joint Venture opportunities and identify commercial partners in the US offshore wind boom.

ARE YOU IN GOVERNMENT AND POLICY DEVELOPMENT?

Demonstrate your role in delivering the US offshore wind industry through efficient siting, leasing, and permitting.

Understand your role in developing a robust offshore wind supply chain and infrastructure plan to support the buildout of a world leading US offshore wind industry.

Develop a collaborative and coherent strategy with industry stakeholders to boost the offshore wind market and infrastructure plan to realize the economic benefits and job creation that offshore wind will bring to America.

2022 will be a big year for US offshore wind so don't miss this opportunity to join the leaders as they forge the path to a clean energy future with offshore wind at its core.

Events at a Glance

Flagship US Offshore Wind 2022, In-Person, Boston. 18-19 July, 2022:

Key themes: siting, permitting, leasing, supply chain, ports infrastructure, grid integration, policy, markets, construction and installation, project execution, marine logistics and vessels.

Overview: The US offshore wind industry boom, projected to generate nearly 35 GW of power in eight East and West Coast states by 2030, presents a \$70 billion CAPEX revenue opportunity to businesses in the U.S. supply chain. An unprecedented 2000 GW of U.S. offshore wind resource remains untapped, waiting to be unleashed!

As this once in a lifetime opportunity presents itself to local and international businesses, the US Offshore Wind Conference and Exhibition returns to Boston with one mission - to accelerate the development of the existing project pipeline and unleash new development areas on the East and West Coasts.

Supply chain deals, joint ventures and policy making– this is the place where it all happens for US offshore wind businesses. You'll meet every major developer, investor, contractor, supplier, manufacturer, policy maker, who hold the keys to thousands of imminent supply chain and service contracts.

Backed by a brand you can trust, the Reuters US offshore wind 2022 will deliver everything you need to know about US offshore wind markets and supply chain activity, helping you to resolve development bottlenecks and facilitate a multitude of supply chain matchmaking activity.

Five Reasons why YOU cannot miss the BIGGEST reunion in the history of Offshore Wind:

- 1 You'll receive all you need to know about current and future OSW projects and lucrative supply chain opportunities from 60+ speakers:** Executives from leading developers and regulators will share their plans for current and future projects, and supply chain requirements.
- 2 You'll meet serious industry collaborators to secure market share as a developer, supplier or advisor:** This event is where the early commercial relationships are formed amongst OSW developers, financiers and supply chain players. Miss it and miss your best opportunity to build your US offshore wind business. Remember - only the early movers will reap the rewards!
- 3 You'll have access to All active and new market players in one place, at one time, to create partnerships for success:** As North America's largest-ever offshore wind event, you'll meet 1,000+ attendees, 60+ speakers, 60+ exhibitors, for focused learning, strategic insight, and business development opportunities. Along with a multitude of supply chain matchmaking activity, you will meet every major developer, operator, investor, EPCI contractor, supplier, manufacturer, consultant, policy maker, and more.
- 4 You achieve all your US Offshore Wind goals in just 2-days:** Find partners, meet clients, speak to key influencers, gather info, assess risks, and seize opportunities throughout your time at this conference & expo.
- 5 You'll learn how US OSW regulatory system is evolving and the evolution of policy in OSW states:** The event sets out the critical details of how the US offshore wind system will work in individual states. US OSW is an evolving very fast and needs to be understood if you are to be a successful market player.
