Intel vPro helps your business:

- Secure more, do more: due to configurability security issues with third-party software and settings.
- Control more, faster: grant users access to convince, verify, and lift security more quickly.
- Move from face-to-face to remote meeting, share more seamlessly.
- Pivot and scale amazingly fast to capture more business.
- Secure more, do more: with unique hardware-based security features that help protect your business' resources and data.

What business professionals use Intel vPro:

- Exceptional performance for users.
- Increased productivity, added protections, and management to maintain even the most demanding workloads and applications.
- New security capabilities that help reduce the attack surface of the PC. It also assists IT in managing a reliable, stable foundation for all PCs built on Intel vPro.

The new Intel vPro Enterprise meets the needs of businesses and supports multi-user, multi-access, and multi-platform usage.

It’s no secret that PC fleet security and management has become mission critical for businesses of every size. The computing experience they desire to deliver their best work every day, while leveraging the GPU for the compute power needed, has taken on a whole new level of urgency and complexity. Businesses of every size are redefining their approach to IT to support the hybrid workplace and increase productivity.

And in today’s “anywhere and everywhere workplace,” security and manageability are commonplace. No matter what size your business is or how complex your PC fleet is, you now need a platform needed to succeed in a rapidly changing digital world.

The new Intel vPro Enterprise now supports Chrome, giving customers built-for-business, built-for-enterprise Chromebooks based on 12th Gen Intel Core processors.

Intel vPro Enterprise for Windows with 12th Gen Intel Core processors includes an all-inclusive solution that combines Intel technologies to help deliver comprehensive security, performance, and compatibility, making fleet maintenance easy and providing dependable business benefits on select devices running Chrome.

Revolutionary Performance

12th Gen Intel Core processors feature revolutionary architecture that intelligently allocates workloads to the right thread on the right core based on workloads and applications. This enables businesses to stay ahead of the curve and pivot quickly to new opportunities.

Business Continuity Made Simple

Revolutionary security helps ensure your entire organization is better prepared to protect and recover from threats, and workloads are more secure. Intel vPro Enterprise for Windows aims to bring complete remote manageability to businesses of every size. It can even allow for access to devices outside the office, such as a home office, while leveraging the power of a remote user. Intel vPro Enterprise for Windows with 12th Gen Intel Core processors includes Intel® Threat Detection Engine, Intel® Software Guard Extensions, Intel® Advance Encryption Standard New Instructions, and Intel® Dynamic Power Optimization.

Complete Management

One of our most powerful features is the Intel® Management Engine (Intel ME) to help protect PCs in your organization. Intel ME enables IT to remotely access all PCs on Intel vPro, IT can be ready to repair, and help protect PCs in your organization, which will help you reduce costs and improve productivity.

Flexible platform choices:

Intel vPro Enterprise for Windows and Intel vPro Enterprise for Chrome provide a complete platform solution designed for businesses.

Corporate platforms:

Intel vPro Enterprise: Grid

Securing systems and mobile computing has been the foundation of Intel vPro throughout its existence. Grid delivers a solution that provides IT professionals with a powerful platform to address the needs of IT professionals:

- Secure more, do more: because of configurability security issues with third-party software and settings.
- Control more, faster: due to faster access and verification, IT can control the systems of their entire organization.
- Move from face-to-face to remote meeting, share more seamlessly.
- Pivot and scale amazingly fast to capture more business. It’s no secret that PC fleet security and management has become mission critical for businesses of every size.

Because satisfaction with computing technology is a key driver of employee satisfaction, recruitment, and retention.
