

INTEL® EXPERIENCE DAY

DISCLOSURES

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more information go to www.intel.com/benchmarks. Performance results are based on testing as of several dates following result information and may not reflect all publicly available security updates. See configuration disclosure for details. No product or component can be absolutely secure.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. Check with your system manufacturer or retailer or learn more at [intel.com].

ОБЛАЧНАЯ ИНФРАСТРУКТУРА INTEL ДЛЯ УДАЛЕННОГО ТЕСТИРОВАНИЯ

Vasily . Lizunov @ intel . com

Для чего сделали

- Гибкая инфраструктура для различных задач:
 - Демо
 - Бенчмарки
 - Проверка совместимости с железом
 - Вовлечение конечного заказчика
 - Удаленные «образцы»
 - Открыты для работы с ODM партнерами

Мне то что?

- Быстро показать клиенту, как новые технологии работают, без заказа образцов
 - Xeon (CLX, CPX, ICX) OPA, Optane/DCPMM, FPGAs, Networking (10/25/100G), NAND SSDs
 - HPC and standard rack FF systems
 - Management (IPMI / OpenBMC & RedFish etc)
- Хорошая инженерное сопровождение как дополнительный «бонус» к использованию лаборатории
 - Даже если компания не в списках на выделенную поддержку
- Богатый склад (mem/CPUs/platforms/AICs) и гибкие конфигурации

Как начать сотрудничество

- Убедитесь, что у вас есть NDA с Intel
- Письменный запрос к вашему аккаунт менеджеру (с описанием сделки)
 - Если акк мгр нет – пишите Vasily.Lizunov @ intel.com
- После того, как запрос принят, обсуждаются
 - Конфигурации
 - Время тестирования
 - Все остальное

Результаты 2018-2019

- Постоянное сотрудничество с SW командами по миру
- HPC & CSP – основные клиенты
- Всего около 40 запросов (20/год) поддержано (сделок на ~\$70M)

ЧТО ДЕЛАЕТ ADC

Deep technical engagement

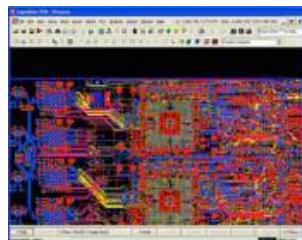

- Provide access to documentation
- Drive technical issues to resolution
- Be the design-in resource

Platform Test & Debug

- Issue debug/resolution
- Test Events & Platform Readiness Workshops

Design Services

- Schematic review
- Board layout review
- Tool delivery & support

Cluster scale testing

- Cluster sizing (performance)
- Power/Thermal testing
- Functional testing, Software
- Remote access to customers

Training

- Design-In visits
- Technology workshops
- Technical Solutions Training

Ecosystem Enablement

- Influence industry
- Enable debug tool vendors

ADC turns Design-wins into Production-wins (billings)

ADC ЛАБОРАТОРИЯ В НИЖНЕМ НОВГОРОДЕ

Test-station with oscilloscope for observing the changes of an electrical signals while troubleshooting malfunctioning electronic equipment

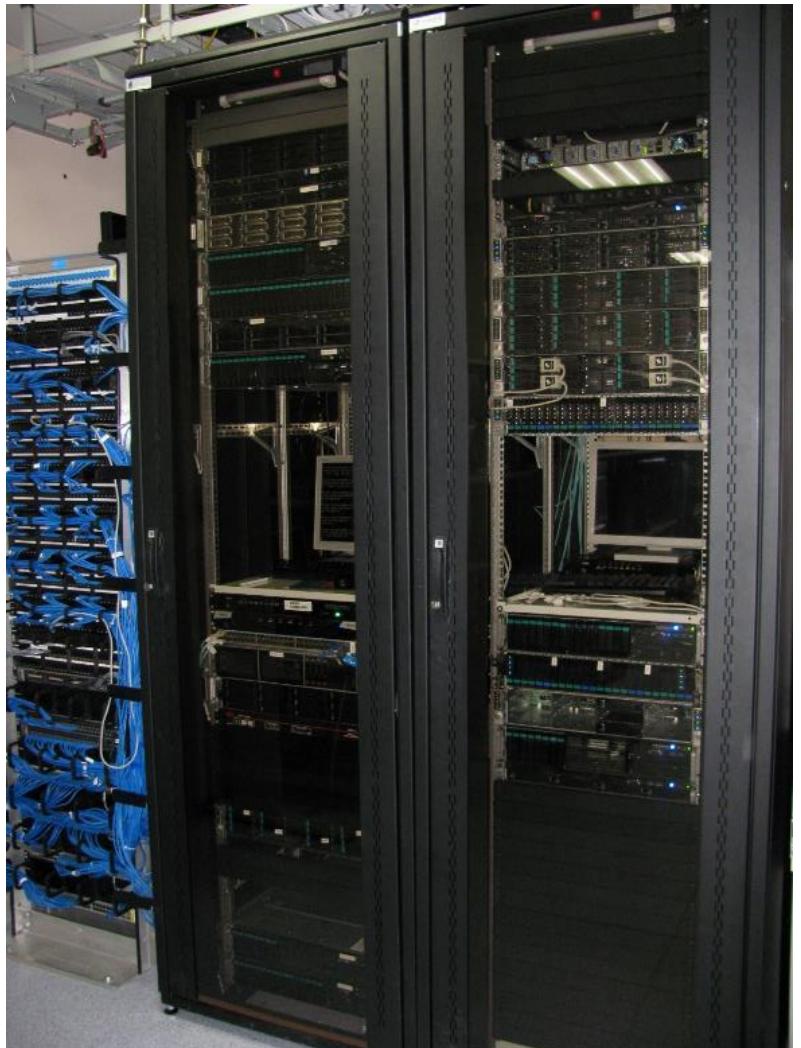

Testing client setup for issue replication and running benchmarks

PCSD systems are checked out for stress testing, issues replication and components compatibility sanity check

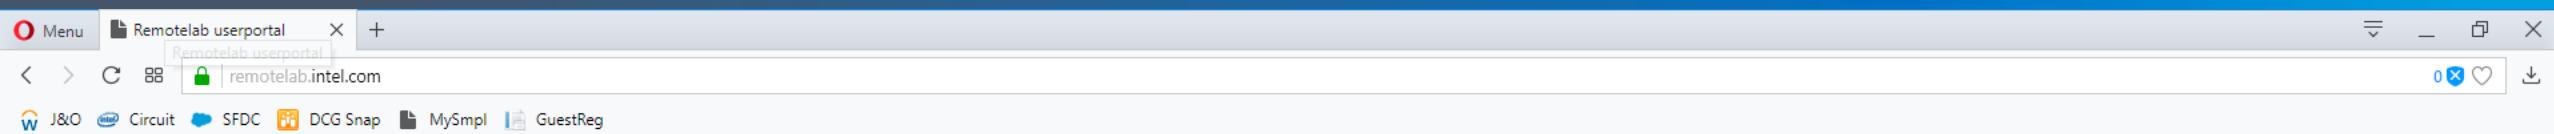

BGA rework station for complicated CRB rework (SPI flash, chipset, CPU socket soldering/unsoldering work)

Cluster for performance scaling, power and thermal evaluation as well as testing of configuration and software tools.

Message of the day

Welcome to the cluster user portal.

Here you can get an overview of the configuration, available hardware and documentation.

Shrine Pass R2600SR system is available for testing

Apache Pass sandbox system is available for testing (4x 128GB AEP ES2)

01/10/2018 Available hardware list updated

Cluster overview

The following configurations are available for full customization and testing. Please check samples availability via Documentation -> Available Hardware page.

HPC - Purley

- 7x Wolf Pass + 16x Buchanan Pass nodes**
- Any available SKL CPU
- Any available fabrics, SSD, accelerators and accessories
- NVMe BeeGFS over OPA, HDD ceph over 1/10GbE

Cloud - Microsoft Azure Stack

- 7x Wolf Pass nodes + HLH (Hardware Lifecycle Host)**
- Intel Xeon Scalable 61xx Family CPU
- All flash storage (NVMe+SATA)
- 10GbE network

HPC - Groveport

- 8x Adams Pass nodes**
- Any available KNL/KNM CPU
- Any available fabrics, SSD, accelerators and accessories
- NVMe BeeGFS over OPA, HDD ceph over 1/10GbE

Cloud - Microsoft S2D

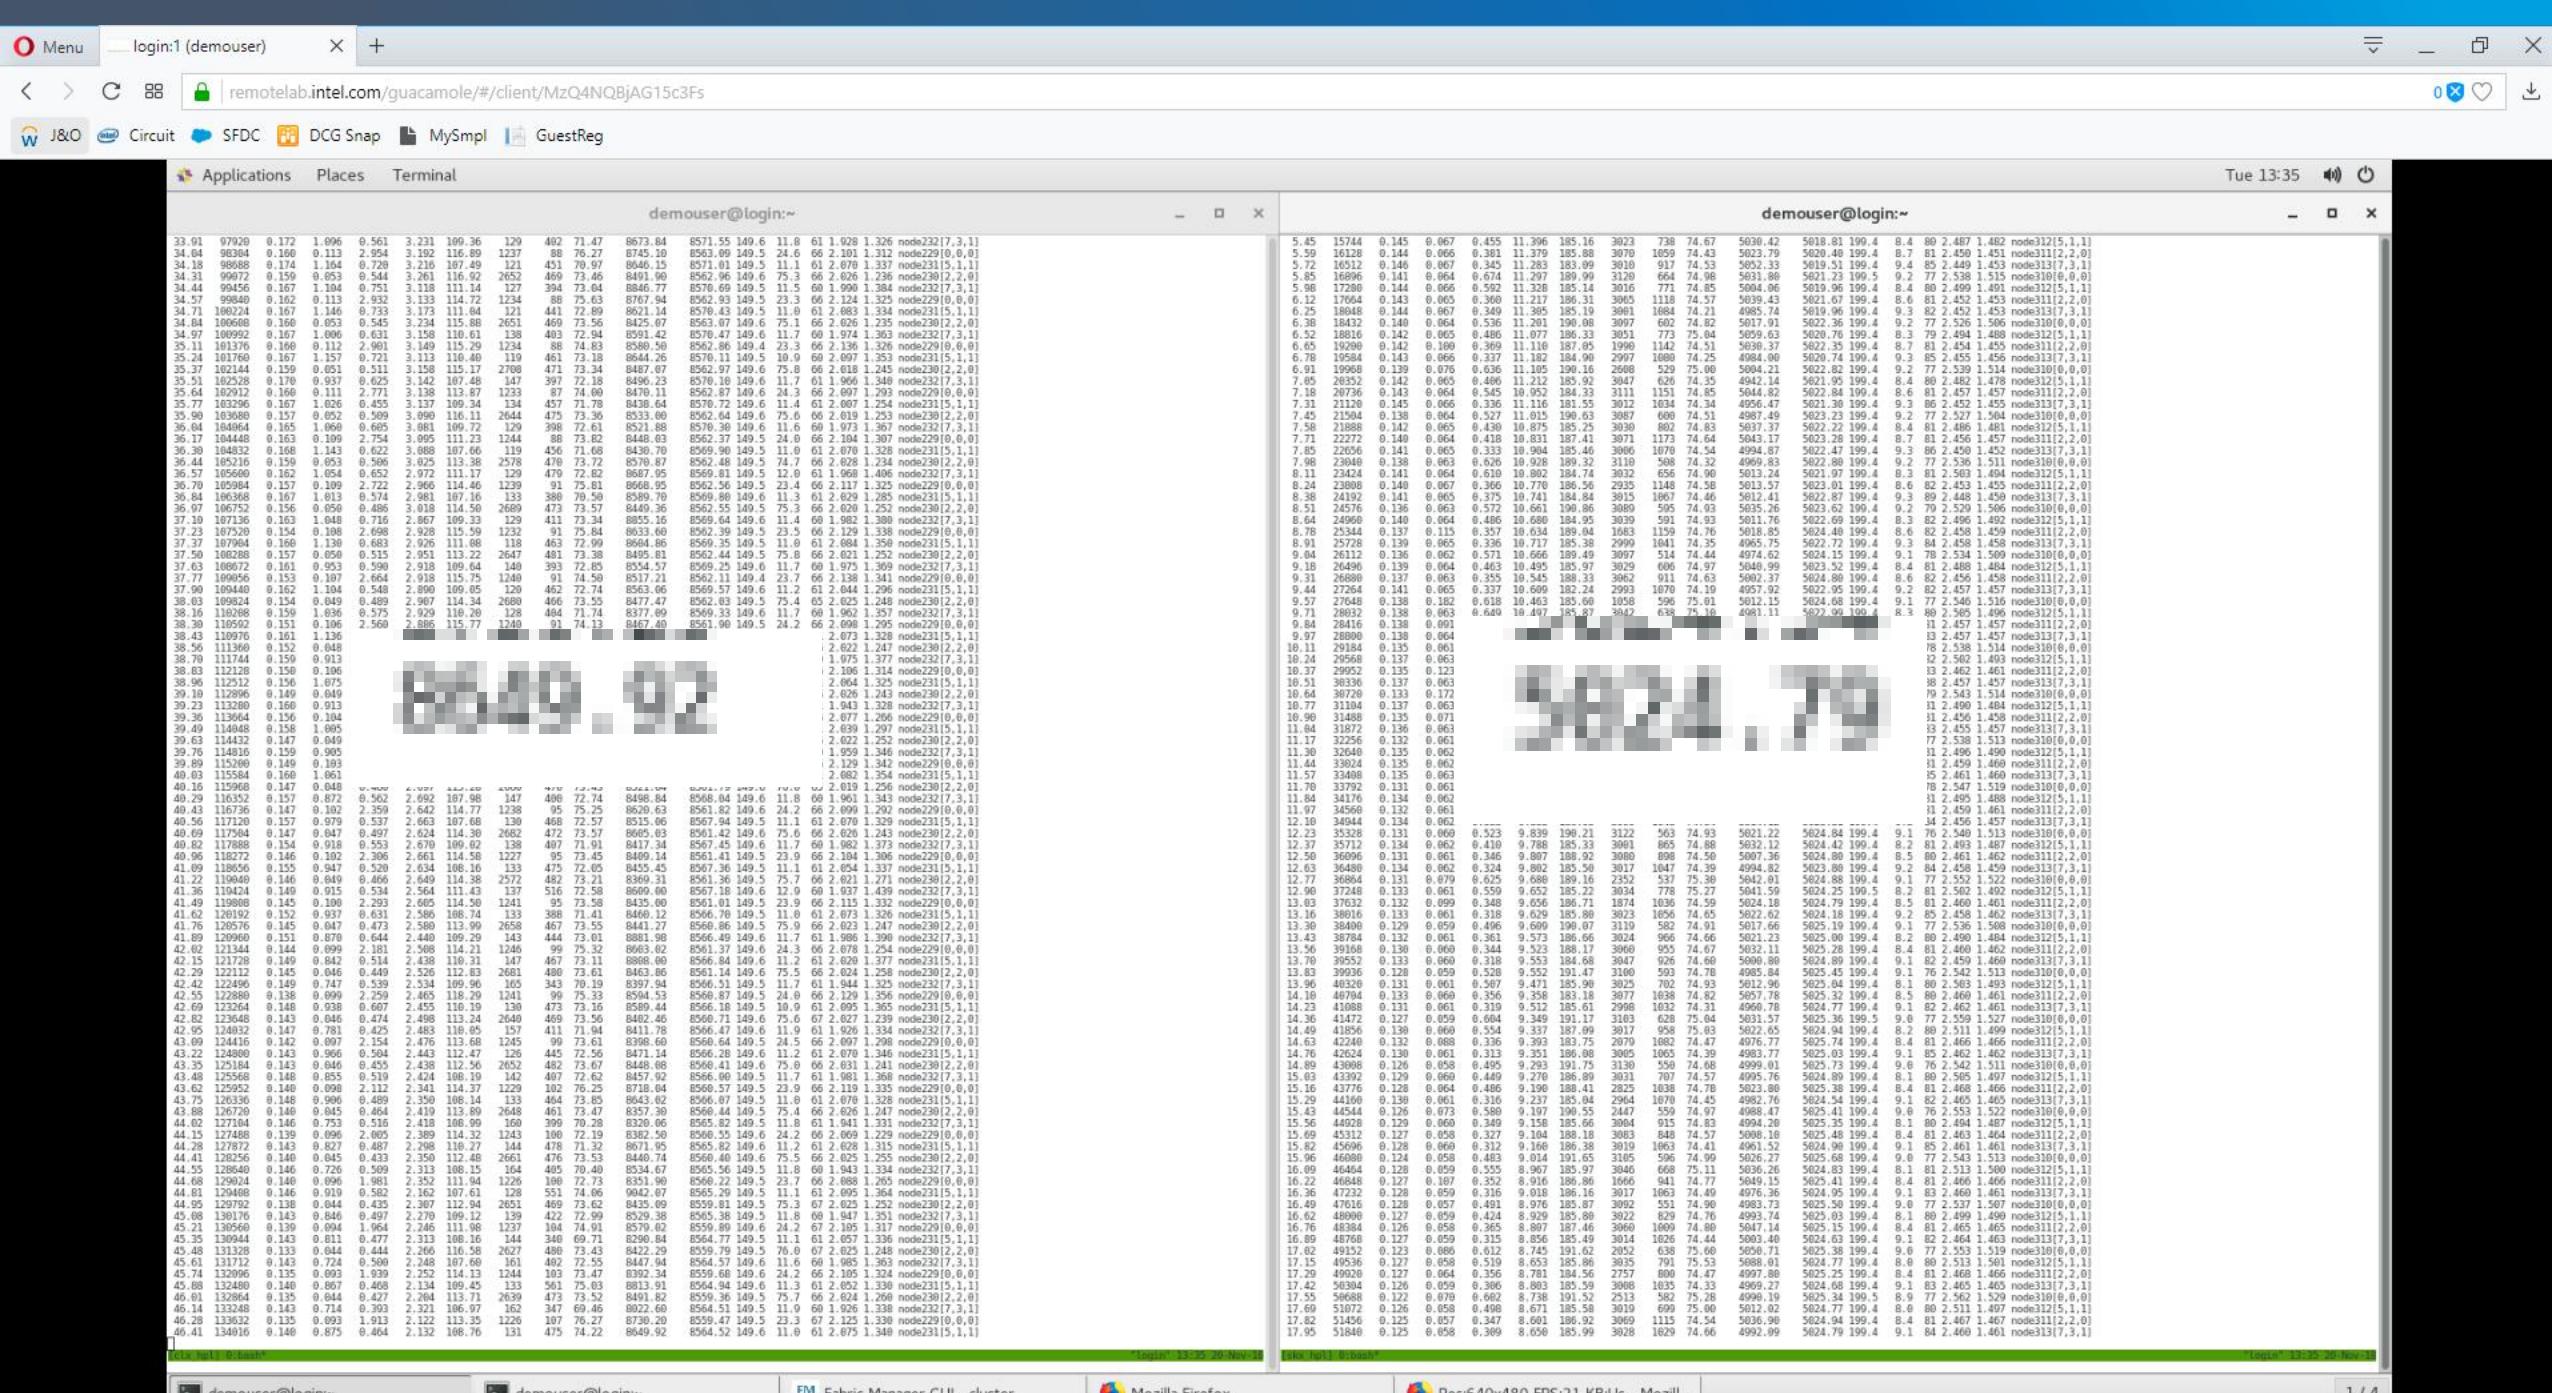

- 4x Taylor Pass 24HDD nodes + management node**
- Any available HSW/BDW CPU, fabrics, SSD, accelerators and accessories
- All flash storage (NVMe+SATA)
- 10/25/40GbE network

HPC - Grantley

- 2x Wildcat Pass + 12x Kennedy/Taylor Pass nodes**
- Any available HSW/BDW CPU
- Any available fabrics, SSD, accelerators and accessories

Cloud - VMWare VSAN

- 4x Taylor Pass 24HDD nodes + management node**
- Any available HSW/BDW CPU, fabrics, SSD, accelerators and accessories
- All flash storage (NVMe+SATA)
