1. Outlook

Introduction

ECONOMY

The US economy continued to rebound during the fourth quarter of 2020 but did so at a slower pace than Q3 of 2020 or what is expected to be recorded in Q1 2021. Real GDP grew at a seasonally adjusted annual rate of 4.1 percent in Q4 2020, versus the 33.4 percent seen in Q3 2020 and the expected 4.7 percent for Q1 2021. Firms added 1.7 million jobs in July, 1.6 million in August and 700,000 in September of last year, but just 680,000 in October, 264,000 in November and a net loss of 300,000 in December. Job growth turned positive again in January (+166,000) and February (+379,000), but there remain almost 10 million fewer jobs than prior to the pandemic – which is both a sign of the lingering economic impact and of the potential for further, rapid economic growth. Three-and-a-half millions of those still-lost jobs are in leisure and hospitality alone, an area that could see rapid growth as the year progresses.

MBA anticipates strong economic growth in the second half of this year, driven by expanded vaccinations, strong household balance sheets, active federal stimulus and pent-up demand.

COMMERCIAL REAL ESTATE FUNDAMENTALS

The pandemic has had a range of impacts on commercial property operating fundamentals, many of which won't be fully understood until later. One thing that is known is that different property types have been affected in very different ways. Hotel and retail properties were the most immediately and dramatically affected by the downturn. Apartment fundamentals have generally held up well, but with some markets – particularly those that have seen more office closures and strong apartment construction deliveries – reporting increased vacancy rates and declining asking rents. Office remains one of the most heavily debated property types, with some observers expecting work-from-home to play a significant role in the future and others anticipating a broad-

based return to the office. Long office lease terms have muted some of the impacts in the near term and may be a significant factor in the sector's total pandemic experience.

The uncertainty across property types led to a drop in new construction activity – except multifamily. Overall the value of commercial real estate-related construction put-in-place in December 2020 was 2.5 percent lower than a year earlier, with declines of 23 percent for lodging, 15 percent for manufacturing, 8 percent for commercial (which includes retail) and 4 percent for office. The value of multifamily construction put-in-place was 17 percent higher than year earlier.

PROPERTY SALES AND VALUES

After major drops in the second and third quarters of 2020, commercial property sales activity picked up in the fourth quarter, driven by multifamily and industrial properties. Sales of the four major property types fell from \$123 billion in Q2 2019 to \$45 billion in Q2 2020, and from \$142 billion in Q3 2019 to \$65 billion in Q3 2020, drops of 63% and 54% respectively. Those declines were felt across property types. In the fourth quarter of 2020, sales of multifamily and industrial properties were roughly equal to their levels from a year earlier, while sales were down 33 percent for office and 42 percent for retail properties.

As investors attempt to look through the pandemic to what might be on the other side, capitalization rates have generally declined during the pandemic to compensate for what are expected to be, for many properties, temporary declines in NOIs. Cap rates ended 2020 at 6.6 percent (versus 6.7 percent a year earlier) for office properties, 6.5 percent (versus 6.7 percent a year earlier) for retail properties, 6.0 percent (versus 6.0 percent a year earlier) for industrial properties and 5.1 percent (versus 5.3 percent a year earlier) for office properties.

OUTLOOK

ENVIRONMENT

PRODUCTION

OUTSTANDING

RELEASES

The impact of the pandemic on property values depends very much on which price index one chooses to look to. The Green Street Advisors CPPI, generally more aligned with REIT valuations and public real estate markets, shows an 8.1 percent decline in commercial property values between December 2019 and December 2020, while the Real Capital Markets price index shows a 5.9 percent increase in values.

FINANCING

The last three months of 2020 were stronger than earlier quarters for borrowing backed by commercial and multifamily properties. Commercial mortgage loan originations during last year's fourth quarter were 18% lower than a year earlier, but up significantly from the very low third quarter. Borrowing and lending remain weakest for the property types most impacted by the pandemic – particularly hotel and retail buildings. Multifamily, led by government-backed financing from FHA, Freddie Mac and Fannie Mae, continued to see the strongest commercial mortgage activity.

A decrease in originations for hotel, retail, office, and health care properties led the overall decline in commercial/multifamily lending volumes when compared to the fourth quarter of 2019. There was a 79 percent year-over-year decrease in the dollar volume of loans for hotel properties, a 72 percent decrease for retail properties, a 56 percent decrease for office properties, and a 12 percent decrease for health care properties. Industrial property loan originations increased 15 percent, and multifamily property lending rose 14 percent.

Among investor types, the dollar volume of loans originated for Commercial Mortgage-Backed Securities (CMBS) declined by 64 percent year-over-year. There was a 40 percent decrease for commercial bank portfolio loans, a 33 percent decrease in life insurance company loans, and an 84 percent increase in the dollar volume of Government Sponsored Enterprises (GSEs - Fannie Mae and Freddie Mac) loans.

On February 9, MBA released an update to its commercial real estate finance forecast. The steep declines in mortgage borrowing and lending seen in 2020 should partially reverse in 2021. The economic rebound MBA anticipates in the second half of the year should bring greater stability to the markets, but with continued differentiation by property type. Much of the path forward will depend on the virus and our confidence and ability to move past it. Commercial and multifamily mortgage bankers are expected to close \$486 billion of loans backed by income-producing properties in 2021, an 11 percent increase from 2020's estimated volume of \$440 billion.

Total multifamily lending alone, which includes some loans made by small and midsize banks not captured in the overall total, is forecast to rise to \$323 billion in 2021 – a 7 percent increase from last year's estimated total of \$302 billion. MBA anticipates additional increases in lending volumes in 2022, with activity rising to \$539 billion in commercial/multifamily mortgage bankers originations and \$358 billion in total multifamily lending.

ORIGINATOR RANKINGS

According to a set of commercial/multifamily real estate finance league tables released by MBA on March 17, the following firms were the top commercial/multifamily mortgage originators in 2020: JLL, CBRE, KeyBank, Meridian Capital Group, Walker & Dunlop, JP Morgan Chase & Company, Wells Fargo, Eastdil Secured, Berkadia, Newmark.

By dollar volume, the top five originators for third parties in 2020 were: JLL, CBRE, Meridian Capital Group, Walker & Dunlop, KeyBank. The top five lenders in 2020 were: KeyBank, Wells Fargo, JP Morgan Chase & Company, Walker & Dunlop, Berkadia. Nine different companies were at the top of the 11 lists reporting total originations by investor groups:

MORTGAGE DEBT OUTSTANDING

Despite a fall-off in borrowing and lending during 2020, the total amount of commercial and multifamily mortgage debt outstanding increased during the year. Continuing the trend of

previous quarters, growth in multifamily mortgage debt outpaced other property types, with increases in federally backed mortgages from Fannie Mae, Freddie Mac, and FHA driving that growth. Strong appetites from all the major capital sources should keep growth going in 2021, but with key differences across property types.

The level of commercial/multifamily mortgage debt outstanding at the end of 2020 was \$212 billion or 5.8 percent higher than at the end of 2019. Total mortgage debt outstanding in the final three months of 2020 rose by 1.5 percent (\$58.2 billion) compared to last year’s third quarter, with all four major investor groups increasing their holdings. Multifamily mortgage debt grew by \$41.8 billion (2.5 percent) to \$1.69 trillion during the fourth quarter, and by \$127.9 billion (8.2 percent) for the entire year.

In the fourth quarter of 2020, agency and GSE portfolios and MBS saw the largest rise in dollar terms in their holdings of commercial/multifamily mortgage debt, with an increase of \$40.2 billion (5.0 percent). Commercial banks increased their holdings by \$7.0 billion (0.5 percent), CMBS, CDO and other ABS issues increased their holdings by \$4.7 billion (0.9 percent), and life insurance companies increased their holdings by \$3.0 billion (0.5 percent).

The \$41.8 billion rise in multifamily mortgage debt outstanding between the third and fourth quarters of 2020 represented a 2.5 percent increase. In dollar terms, agency and GSE portfolios and MBS saw the largest increase, at \$40.2 billion (5.0 percent), in their holdings of multifamily mortgage debt. Commercial banks increased their holdings of multifamily mortgage debt by \$1.4 billion (0.3 percent). State and local government increased holdings by 0.9 percent to \$992 million. CMBS, CDO, and other ABS issues saw the largest decline (1.7 percent) in their holdings, by \$893 million.

Commercial and multifamily mortgage maturities among non-banks lenders are the highest since at least 2009. Many life company, GSE and FHA loans that would have been coming due

this year were instead refinanced or prepaid early. Those declines have been more than made up for by shorter-term loans with 2021 maturity dates made by CMBS and investor-driven lenders. The COVID-19 pandemic has also marginally affected the level of maturities this year. As of the end of 2020, 1.5 percent of the balance of outstanding commercial and multifamily mortgages had already matured but remained outstanding. By contrast, that figure stood at 0.8% at the end of 2019, with the increase most likely driven by loans that faced challenges being refinanced given the COVID-19 pandemic. Between 2009 and 2012 the comparable figure ranged from 2.25% and 2.75%.

SERVICER RANKINGS

On February 10, MBA released its year-end ranking of commercial and multifamily mortgage servicers’ volumes as of December 31, 2020.

At the top of the list of firms is Wells Fargo Bank, N.A., with \$712 billion in master and primary servicing, followed by PNC Real Estate/Midland Loan Services (\$668 billion), KeyBank National Association (\$326 billion), Berkadia Commercial Mortgage LLC (\$303 billion), and CBRE Loan Services (\$264 billion).

Among servicers with retained or purchased servicing of U.S. mortgaged, income-producing properties, Wells Fargo, PNC/Midland, and KeyBank are the largest primary and master servicers for CMBS, CDO or other ABS loans; PGIM Real Estate Finance is the largest for credit company, pension funds, REITs, and investment fund loans; Wells Fargo, Walker & Dunlop, and Berkadia are the largest for Fannie Mae loans; Wells Fargo, KeyBank, and PNC are the largest for Freddie Mac loans; Lument Capital, Greystone, and Walker & Dunlop are the largest for FHA & Ginnie Mae loans; JLL, CBRE, and NorthMarq for life insurance company loans; and Wells Fargo for loans held in warehouse. PNC, CWC Capital Asset Management LLC, and KeyBank are the largest named special servicers.

Wells Fargo, PNC, and MetLife Investment Management are the top servicers for loans held in own portfolio, U.S. mortgaged,

income-producing properties. PNC, Berkadia, and SitusAMC are the top fee-for-service primary and master servicers of U.S. mortgaged, income producing properties; Wells Fargo, Trimont Real Estate Advisors, and KeyBank rank as the top master and primary servicers of other types of commercial real estate related-assets located in the United States; and SitusAMC, CBRE, and Mount Street are the top primary and master servicers of non-US CRE-related assets.

LOAN PERFORMANCE

After a slight deterioration at the end of 2020, commercial and multifamily mortgage performance improved for the second straight month in February, bringing delinquency rates down to the lowest level since April 2020. Lodging and retail property loans continue to show the greatest stress, but the shares of outstanding loan balances that are delinquent have fallen from their peak levels by 25 percent and 28 percent, respectively. Across all property types, the share of outstanding balances becoming newly delinquent is also the lowest since the onset of the pandemic, and less than one-quarter of the level from April 2020.

The balance of commercial and multifamily mortgages that are not current decreased in February to its lowest level since April 2020.

- 94.8% of outstanding loan balances were current, up from 94.3% in January.
- 3.5% were 90+ days delinquent or in REO, down from 3.6% a month earlier.
- 0.3% were 60-90 days delinquent, unchanged from a month earlier.
- 0.6% were 30-60 days delinquent, unchanged from a month earlier.
- 0.8% were less than 30 days delinquent, down from 1.2% a month earlier.

Loans backed by lodging and retail properties continue to see the greatest stress. The overall share of lodging, retail, industrial, and office loan balances that are delinquent decreased in February.

- 20.6% of the balance of lodging loans were not current in January, down from 21.5% a month earlier.
- 10.8% of the balance of retail loan balances were delinquent, down from 11.8% a month earlier.

Non-current rates for other property types were lower during the month.

- 2.7% of the balances of industrial property loans were non-current, down from 4.0% a month earlier.
- 2.4% of the balances of office property loans were non-current, down from 3.0% a month earlier.
- 1.7% of multifamily balances were non-current, down from 1.8% a month earlier.

2. Commercial/Multifamily Finance Environment

Extract of Commercial Real Estate Comments from the Federal Reserve Board's Beige Book
March 3, 2021

This report was prepared at the Federal Reserve Bank of Atlanta based on information collected on or before February 22nd. This document summarizes comments received from contacts outside the Federal Reserve System and is not a commentary on the views of Federal Reserve officials.

NATIONAL SUMMARY

Economic activity expanded modestly from January to mid-February for most Federal Reserve Districts. Most businesses remain optimistic regarding the next 6-12 months as COVID-19 vaccines become more widely distributed. Reports on consumer spending and auto sales were mixed. Although a few Districts reported slight improvements in travel and tourism activity, overall conditions in the leisure and hospitality sector continued to be restrained by ongoing COVID-19 restrictions. Despite challenges from supply chain disruptions, overall manufacturing activity for most Districts increased moderately from the previous report. Among Districts reporting on nonfinancial services, activity was mixed, though most reported modest growth over the reporting period. Some Districts noted that financial institutions experienced declines in loan volumes, but most cited lower delinquency rates and elevated deposit levels. Historically low mortgage interest rates continued to spur robust demand for both new and existing homes in most Districts, and home prices continued to rise in many areas of the U.S. On balance, commercial real estate conditions in the hotel, retail, and office sectors deteriorated somewhat, while activity in the multifamily sector remained steady and the industrial segment continued to strengthen. Districts reporting on energy observed a slight uptick in activity related to oil and gas production and energy consumption. Overall, reports on agricultural conditions were somewhat improved since the previous report. Transportation activity grew modestly for many Districts.

FIRST DISTRICT—BOSTON

Commercial real estate conditions in the First District were mostly unchanged since December. Throughout the District there remained significant disparities between the industrial sector—which saw robust demand and extremely low vacancy rates—and the retail and hospitality sectors, both of which continued to register very weak demand and declining property values. The life sciences industry, concentrated in greater Boston, extended its boom in the leasing and construction of lab space. Although office leasing was mostly sluggish, a Providence contact reported a slight uptick in leasing activity that was noteworthy in that tenants expressed interest in longer-term leases. The same contact noted that concessions on Providence office space had increased, lowering effective rents if not asking rents. Contacts expect demand for office space to remain muted or to improve modestly in the first half of 2021, and to improve significantly in the second half. Hotel demand is expected to rebound in mid-to-late 2021 as well. Nonetheless, contacts are forecasting a permanent decrease in office occupancy of 20 percent or more in the post-pandemic economy, and a glut of lab space in greater Boston remains a risk at the two-to-three-year horizon.

SECOND DISTRICT—NEW YORK

Commercial real estate markets have weakened further, across the District. Retail and office markets have been particularly weak in New York City, where vacancy and availability rates have soared and asking rents have continued to decline, with landlords reportedly offering increased concessions.

New construction activity has remained sluggish in both the residential and commercial segments. Contacts in the construction industry noted widespread weakening in activity, possibly exacerbated by harsh weather, and they remain somewhat pessimistic about the near-term

outlook. Contacts continued to report sharp increases in the cost of materials, as well as supply disruptions.

THIRD DISTRICT—PHILADELPHIA

Philadelphia’s commercial construction activity appeared to have slowed slightly. The project pipeline and COVID-19 safety protocols continue to support levels at about 80 percent of the prior year.

Commercial leasing activity slowed slightly after falling moderately in the prior period. Contacts continued to note uncertainty about the future demand for office space and don’t expect clarity until large downtown offices are able to resume normal operations.

FOURTH DISTRICT—CLEVELAND

Nonresidential construction and real estate activity edged higher, on balance, as demand for industrial and distribution space increased. By contrast, activity in the office and retail segments remained weak. Contacts anticipated that nonresidential construction and leasing activity would improve modestly in the next few months.

FIFTH DISTRICT—RICHMOND

Fifth District commercial real estate leasing increased modestly in recent weeks but was below year-ago levels. While retail vacancies remained elevated, more businesses looked to add locations, and vacated restaurant space sparked interest. Office tenants continued to ask for short-term lease renewals, and many downsized, but others added space and some landlords found new clients. Industrial leasing was very strong, as inventories were low and new construction continued. Multifamily leasing remained soft, with some landlords upping incentives and reducing rent.

Overall, loan activity declined slightly for this period. Respondents indicated tepid conditions for commercial real estate lending. Business lending picked up slightly despite companies being uncertain about economic conditions and less demand for round three of PPP funding. Mortgage volume remains strong but down from previous periods due to the limited supply of available homes for sale. Deposit growth was tempered as financial institutions reduced rates on interest bearing accounts. Overall credit quality and delinquencies remained good

despite an ending of most deferrals and forbearances. The respondents reported increased competition as financial institutions are struggling for loan growth.

SIXTH DISTRICT—ATLANTA

Commercial real estate (CRE) contacts reported that the sector continued to be hampered by the effects of the pandemic; however, some areas of CRE showed improvement. Conditions in the retail sector improved modestly and rent collections recovered from the dismal results experienced in mid-2020. Multifamily conditions were mixed; however, leasing activity appeared to be picking up in some of the harder hit areas. The hospitality sector continued to be negatively impacted by low levels of tourism. Banks reported that financing for commercial projects was available and demand for new construction rose.

SEVENTH DISTRICT—CHICAGO

Nonresidential construction activity increased modestly. Contacts in southeast Michigan said there was a noticeable increase in industrial and warehouse construction in vacant areas of Detroit. Commercial real estate activity was flat. The office sector continued to struggle. Contacts indicated that some office tenants were downsizing their footprint in response to the pandemic. There were also reports of leasing deals that included long periods of free rent. Prices and rents fell slightly, and the availability of sublease space increased slightly.

Financial conditions were little changed on balance over the reporting period. Participants in the equity and bond markets reported a small improvement in conditions, though volatility remained elevated. Business loan demand decreased modestly, with declines concentrated in commercial real estate and in leisure and hospitality. That said, contacts noted that round two of the Paycheck Protection Program was supporting activity. Business loan quality edged down, with declines reported in the commercial real estate, hospitality, and retail sectors. Business loan standards tightened slightly overall. In consumer markets, loan demand decreased slightly, though residential mortgage activity remained strong. Standards for consumer loans tightened slightly and loan quality remained unchanged on balance. A contact at an organization that assists consumers in obtaining home loans noted that

many clients who were participating in the federal government’s COVID-19 mortgage forbearance program were concerned about whether their incomes would recover enough for them to resume making payments in June, when the program is set to expire.

EIGHTH DISTRICT—ST. LOUIS

Commercial real estate activity has been mixed since our previous report, as office and retail demand are lower this quarter. A contact in Louisville reported the increase in telework has decreased demand for office space, and, going forward, contacts are uncertain if and how telework will continue to impact demand. Meanwhile, demand for industrial properties is up due to e-commerce and micro-fulfillment facilities. Commercial construction is similarly mixed, as multi-family projects, warehouses, and logistics facilities are the main projects currently being built. Some developers also reported switching hotel projects for apartment buildings.

NINTH DISTRICT—MINNEAPOLIS

Commercial construction continued to slow overall. Total active, major construction projects across the District were lower than a year earlier. A majority of contacts reported that recent revenue fell compared with both 2019 and fall of 2020, and expectations for the first quarter of this year were similar. The frequency of project delays and cancellations has potentially peaked, according to sources; however, more reported a decrease in new projects out for bid than those reporting increases. Some places, like Rapid City, S.D., and certain subsectors, like utilities, reportedly have not seen a similar slowdown. Commercial real estate was mixed. Industrial property remained generally stable, with steady leasing activity and low vacancy rates in many markets. However, other sectors like office and retail saw increases in vacancy rates and available sublease space.

TENTH DISTRICT—KANSAS CITY

Commercial vacancy rates decreased for the first time in over a year, and absorption rates remained flat. In addition, commercial construction activity increased slightly. However, sales, prices, and rents fell modestly, and developers’ access to credit became modestly more difficult. Overall, commercial real estate conditions remained worse than a year ago. Expectations for further declines in vacancy rates and increases in

absorption and construction pointed to a gradual improvement in the commercial real estate sector over the next few months.

ELEVENTH DISTRICT—DALLAS

Apartment demand was mostly steady, and rent collections were generally holding up in major Texas markets. Industrial construction and leasing activity remained strong. Office leasing stayed weak, but contacts said market conditions appeared to be slowly stabilizing.

TWELFTH DISTRICT—SAN FRANCISCO

Activity in the commercial real estate market weakened slightly on net. Demand for retail spaces, office buildings, and hospitality real estate continued to be negatively affected by disruptions stemming from the pandemic. On the other hand, demand for warehouse and industrial properties remained strong, and a few contacts also noted a rise in public construction projects. One contact in the Mountain West reported that demand for office space held steady in the area, partly due to the redesign of some offices to better accommodate social distancing measures.

Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations

February 8, 2021

Commercial and multifamily mortgage loan originations were 18 percent lower in the fourth quarter of 2020 compared to a year ago, and increased 76 percent from the third quarter of 2020, according to the Mortgage Bankers Association’s (MBA) Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations.

A preliminary MBA measure of commercial and multifamily mortgage originations volumes shows borrowing and lending in 2020 was 30 percent lower than in 2019, with all major property types and most capital sources – outside government-backed loans – seeing lower levels of activity.

“The last three months of 2020 were stronger than earlier quarters for borrowing backed by commercial and multifamily properties,” said Jamie Woodwell, MBA’s Vice President of Commercial Real Estate Research. “Commercial mortgage loan originations during last year’s fourth quarter were 18% lower than a year earlier, but up significantly from the very low third quarter. Borrowing and lending remain weakest for the property types most impacted by the pandemic – particularly hotel and retail buildings. Multifamily, led by government-backed financing from FHA, Freddie Mac and Fannie Mae, continued to see the strongest commercial mortgage activity.”

Commercial/Multifamily Mortgage Bankers Originations Index
2001 quarterly average = 100

ORIGINATIONS DECREASE 18 PERCENT IN THE FOURTH QUARTER OF 2020

A decrease in originations for hotel, retail, office, and health care properties led the overall decline in commercial/multifamily lending volumes when compared to the fourth quarter of 2019. There was a 79 percent year-over-year decrease in the dollar volume of loans for hotel properties, a 72 percent decrease for retail properties, a 56 percent decrease for office properties, and a 12 percent decrease for health care properties. Industrial property loan originations increased 15 percent, and multifamily property lending rose 14 percent.

Among investor types, the dollar volume of loans originated for Commercial Mortgage-Backed Securities (CMBS) declined by 64 percent year-over-year. There was a 40 percent decrease for commercial bank portfolio loans, a 33 percent decrease in life insurance company loans, and an 84 percent increase in the dollar volume of Government Sponsored Enterprises (GSEs – Fannie Mae and Freddie Mac) loans.

FOURTH QUARTER ORIGINATIONS UP 76 PERCENT FROM THE THIRD QUARTER OF 2020

On a quarterly basis, fourth quarter originations for hotel properties jumped 411 percent compared to the third quarter 2020. There was a 136 percent increase in originations for industrial properties, a 111 percent increase for retail properties, and a 77 percent increase for multifamily properties. Originations for health care properties increased 77 percent, and originations for office properties increased 26 percent.

Among investor types, between the third and four quarter of 2020, the dollar volume of loans for commercial bank portfolios increased 113 percent, loans for life insurance companies increased 100 percent, originations for GSEs increased 67 percent, and the dollar volume of loans for CMBS increased by 35 percent.

PRELIMINARY 2020 ORIGINATIONS 30 PERCENT LOWER THAN 2019
A preliminary measure of commercial and multifamily mortgage originations volumes shows activity in 2020 was 30 percent lower than in 2019. By property type, originations for hotel properties decreased 77 percent from 2019, and there was a 69 percent decrease for retail properties, a 50 percent decrease for office properties, a 27 percent decrease for health care properties, a 18 percent decrease for industrial properties, and multifamily property originations decreased 8 percent. Among investor types, 2020 versus 2019, loans for CMBS decreased 58 percent, originations for commercial bank portfolios decreased 44 percent, and loans for life insurance companies decreased 39 percent. GSE loans increased 18 percent.

In late March, MBA will release its Annual Origination Summation report for 2020 with final origination figures for the year.

4. Commercial/Multifamily Mortgage Debt Outstanding

March 16, 2021

The level of commercial/multifamily mortgage debt outstanding at the end of 2020 was \$212 billion (5.8 percent) higher than at the end of 2019, according to the Mortgage Bankers Association’s (MBA) latest Commercial/Multifamily Mortgage Debt Outstanding quarterly report.

MBA’s report found that total mortgage debt outstanding in the final three months of 2020 rose by 1.5 percent (\$58.2 billion) compared to last year’s third quarter, with all four major investor groups increasing their holdings. Multifamily mortgage debt grew by \$41.8 billion (2.5 percent) to \$1.69 trillion during the fourth quarter, and by \$127.9 billion (8.2 percent) for the entire year.

“Despite a fall-off in borrowing and lending during 2020, the total amount of commercial and multifamily mortgage debt outstanding increased during the year,” said Jamie Woodwell, MBA’s Vice President of Commercial Real Estate Research. “Continuing the trend of previous quarters, growth in multifamily mortgage debt outpaced other property types, with increases in federally-backed mortgages from Fannie Mae, Freddie Mac, and FHA driving that growth. Strong appetites from all the major capital sources should keep growth going in 2021, but with key differences across property types.”

The four major investor groups are: bank and thrift; commercial mortgage-backed securities (CMBS), collateralized debt obligation (CDO) and other asset backed securities (ABS) issues; federal agency and government sponsored enterprise (GSE) portfolios and mortgage-backed securities (MBS); and life insurance companies.

MBA’s analysis summarizes the holdings of loans or, if the loans are securitized, the form of the security. For example, many life insurance companies invest both in whole loans for which they hold the mortgage note (and which appear in this data under “Life Insurance Companies”), and in CMBS, CDOs and other ABS for which the security issuers and

Commercial Multifamily Mortgage Debt Outstanding
By Investor Group, Fourth Quarter 2020

trustees hold the note (and which appear here under CMBS, CDO and other ABS issues).

Commercial banks continue to hold the largest share (38 percent) of commercial/multifamily mortgages at \$1.5 trillion. Agency and GSE portfolios and MBS are the second largest holders of commercial/multifamily mortgages, at \$838 billion (22 percent of the total). Life insurance companies hold \$580 billion (15 percent), and CMBS, CDO and other ABS issues hold \$533 billion (14 percent).

MULTIFAMILY MORTGAGE DEBT OUTSTANDING

Looking solely at multifamily mortgages, agency and GSE portfolios and MBS hold the largest share of total debt outstanding at \$838 billion (50 percent of the total), followed by commercial banks with \$480 billion (28

percent), life insurance companies with \$168 billion (10 percent), state and local governments with \$106 billion (6 percent), and CMBS, CDO and other ABS issues with \$51 billion (3 percent).

CHANGES IN COMMERCIAL/MULTIFAMILY MORTGAGE DEBT OUTSTANDING

In the fourth quarter of 2020, agency and GSE portfolios and MBS saw the largest rise in dollar terms in their holdings of commercial/multifamily mortgage debt, with an increase of \$40.2 billion (5.0 percent). Commercial banks increased their holdings by \$7.0 billion (0.5 percent), CMBS, CDO and other ABS issues increased their holdings by \$4.7 billion (0.9 percent), and life insurance companies increased their holdings by \$3.0 billion (0.5 percent).

In percentage terms, agency and GSE portfolios and MBS saw the largest increase - 5.0 percent - in their holdings of commercial/multifamily mortgages.

CHANGES IN MULTIFAMILY MORTGAGE DEBT OUTSTANDING

The \$41.8 billion rise in multifamily mortgage debt outstanding between the third and fourth quarters of 2020 represented a 2.5 percent increase. In dollar terms, agency and GSE portfolios and MBS saw the largest increase, at \$40.2 billion (5.0 percent), in their holdings of multifamily mortgage debt. Commercial banks increased their holdings of multifamily mortgage debt by \$1.4 billion (0.3 percent). State and local government increased holdings by 0.9 percent to \$992 million. CMBS, CDO, and other ABS issues saw the largest decline (1.7 percent) in their holdings, by \$893 million.

In percentage terms, REITs recorded the largest increase in holdings of multifamily mortgages (16.1 percent), and private pension funds saw the biggest decrease (10.0 percent).

CHANGES IN COMMERCIAL/MULTIFAMILY MORTGAGE DEBT OUTSTANDING DURING 2020

Between December 2019 and December 2020, agency and GSE portfolios and MBS saw the largest gain (12.6 percent) in dollar terms in their holdings of commercial/multifamily mortgage debt - an increase of

\$94 billion. Commercial banks increased their holdings of commercial/multifamily mortgages by \$57.9 billion (4.1 percent).

In percentage terms, agency and GSE portfolios and MBS saw the largest increase (12.6 percent) in their holdings of commercial/multifamily mortgages.

CHANGES IN MULTIFAMILY MORTGAGE DEBT OUTSTANDING DURING 2020

The \$127.9 billion rise in multifamily mortgage debt outstanding during 2020 represents an 8.2 percent increase. In dollar terms, agency and GSE portfolios and MBS saw the largest increase in their holdings of multifamily mortgage debt at 13 percent (\$93.7 billion). Federal government saw the largest decrease in their holdings down \$479 million (4.1 percent).

In percentage terms, agency and GSE portfolios and MBS recorded the largest increase in their holdings of multifamily mortgages, 13 percent, while private pension funds saw the largest decrease, 31 percent.

MBA's complete Commercial/Multifamily Mortgage Debt Outstanding report can be downloaded here: <https://www.mba.org/news-research-and-resources/research-and-economics/commercial/-multifamily-research/commercial/multifamily-mortgage-debt-outstanding>.

The report's analysis is based on data from the Federal Reserve Board's Financial Accounts of the United States, the Federal Deposit Insurance Corporation's Quarterly Banking Profile, Trepp LLC, and data from Wells Fargo Securities. More information on this data series is contained in Appendix A.

APPENDIX A

MBA’s analysis is based on data from the Federal Reserve Board’s *Financial Accounts of the United States*, the Federal Deposit Insurance Corporation’s *Quarterly Banking Profile* and data from Wells Fargo Securities.

Bank Holdings

MBA’s analysis of commercial and multifamily mortgage debt outstanding was changed in the fourth quarter of 2010 to exclude two categories of loans that had previously been included;

- a. loans for acquisition, development and construction and
- b. loans collateralized by owner-occupied commercial properties.

By excluding these loan types, MBA’s analysis more accurately reflects the balance of loans supported by office buildings, retail centers, apartment buildings and other income-producing properties that rely on rents and leases to make their payments.

For the fourth quarter 2020, the Federal Reserve Board’s Flow of Funds Accounts data attributed \$2.4 trillion of outstanding commercial and multifamily mortgages to banks and thrifts. Comparing this number to the FDIC’s Quarterly Banking Profile for the same period, one sees that banks and thrifts held \$480 billion of multifamily mortgages and \$1.57 trillion of non-farm nonresidential mortgages, of which 64 percent or \$998 billion were income-producing. The combined \$1.48 trillion of mortgages backed by multifamily and other income-producing properties is included in this analysis. The \$2.4 trillion total reported by the Federal Reserve also includes \$570 billion of loans collateralized by owner-occupied commercial properties and another \$390 billion of loans backed by acquisition, development and construction projects (including those for single-family development), which are excluded in from this analysis.

Estimated Components of Federal Reserve’s Flow of Funds “Commercial and Multifamily Mortgages” Held by Banks and Thrifts

(\$Billions)

Source: MBA, Federal Reserve Board of Governors, and FDIC

Mortgages in CMBS and held by REITs

Beginning with its Q2 2014 release, the Federal Reserve's *Financial Accounts of the United States* adjusted its balance of commercial mortgages held in CMBS and by REITs to reflect the impact of FAS 167 and its implications for how entities report certain securitized mortgages on their balance sheets. The effect of this change was to inflate the balance of mortgages appearing under REITs by approximately \$130 billion and to reduce the balance appearing under CMBS by the same amount. From an accounting perspective, such changes are required, but the changes lead to a significant distortion of the size of the CMBS and REIT markets.

For CMBS, MBA corrects for this by relying on data from Wells Fargo Securities to size the balance of commercial and multifamily mortgages in CMBS. (The analysis continues to rely on the Financial Accounts of the United States to size multifamily balances held in CMBS, as the FAS 167 adjustments did not affect them.)

For REIT balances, MBA uses Fed data to reverse the FAS 167 inclusions and thus to report the mortgages, and not securitized assets, that REITs hold. The full corrected series are available as a part of MBA's CREF Database. Contact CREFResearch@mba.org for more information.

Commercial/Multifamily Mortgage Delinquencies

Commercial and Multifamily Mortgage Delinquency Rates Continue to Vary by Capital Sources

March 4, 2021

Commercial and multifamily mortgage delinquencies were mixed in the fourth quarter of 2020, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Delinquency Report.

MBA's quarterly analysis looks at commercial/multifamily delinquency rates for five of the largest investor-groups: commercial banks and thrifts, commercial mortgage-backed securities (CMBS), life insurance companies, Fannie Mae and Freddie Mac. Together, these groups hold more than 80 percent of commercial/multifamily mortgage debt outstanding. MBA's analysis incorporates the measures used by each individual investor group to track the performance of their loans. Because each investor group tracks delinquencies in its own way, delinquency rates are not comparable from one group to another. As just one example, Fannie Mae reports loans receiving payment forbearance as delinquent, while Freddie Mac excludes those loans if the borrower is in compliance with the forbearance agreement.

Based on the unpaid principal balance (UPB) of loans, delinquency rates for each group at the end of the fourth quarter of 2020 were as follows:

- Banks and thrifts (90 or more days delinquent or in non-accrual): 0.83 percent, an increase of 0.11 percentage points from the third quarter of 2020;
- Life company portfolios (60 or more days delinquent): 0.16 percent, a decrease of 0.01 from the third quarter;
- Fannie Mae (60 or more days delinquent): 0.98 percent, a decrease of 0.14 percentage points from the third quarter;
- Freddie Mac (60 or more days delinquent): 0.16 percent, an increase of 0.03 from the third quarter; and

- CMBS (30 or more days delinquent or in REO): 7.50 percent, a decrease of 1.10 percentage points from the third quarter.

Construction and development loans are generally not included in the numbers presented in this report, but are included in many regulatory definitions of 'commercial real estate' despite the fact they are often backed by single-family residential development projects rather than by office buildings, apartment buildings, shopping centers, or other income-producing properties. The FDIC delinquency rates for bank and thrift held mortgages reported here do include loans backed by owner-occupied commercial properties. Differences between the delinquency measures are detailed in Appendix A.

To better understand the ways the COVID pandemic is and is not affecting commercial mortgage performance, MBA worked with its servicer members to develop the CREF Loan Performance Survey. For more information on the most recent results and the historical series go to:

<https://www.mba.org/store/products/research/general/report/commercial-real-estate-finance-loan-performance-survey>

Note: Differences between the delinquency measures are detailed in Appendix A.

APPENDIX A SOURCES & MEASURES OF DELINQUENCIES

Commercial Mortgage-backed Securities (CMBS)

Source: Trepp LLC, Wells Fargo Securities, LLC and Intex Solutions, Inc. The delinquency rate for CMBS loans covers loans 30+ days delinquent, including those in foreclosure, and real estate owned (REO). The CMBS rate is the only one to include REO in either the numerator or the denominator. This series includes all private-label (non-Ginnie Mae, Fannie Mae or Freddie Mac issued) deals that are currently outstanding, including both fixed- and floating-rate deals. In reports released prior to Q3 2011, this series included only deals issued prior to 2009. Beginning with the Q3 2011 release all deals are included regardless of issue date.

Life Companies

Source: American Council of Life Insurers

The delinquency rate for life insurance company loans covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator.

Fannie Mae

Source: Fannie Mae Monthly Volume Summary and Office of Federal Housing Enterprise Oversight Annual Reports to Congress the delinquency rate for multifamily loans either held in portfolio or securitized and guaranteed by the company covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator. The company was unable to provide December delinquency figures for the years 2000 to 2004, so the fourth quarter numbers presented for those years are November, rather December, figures. In January 2011, Fannie Mae revised its 2010 monthly multifamily delinquency rates for all periods presented to exclude multifamily borrowers who have entered into a forbearance agreement and are abiding by the terms of the agreement, but had been previously included in the multifamily delinquency rates due to an error.

Freddie Mac

Source: Freddie Mac Monthly Volume Summary and Office of Federal Housing Enterprise Oversight Annual Reports to Congress

The delinquency rate for multifamily loans either held in portfolio or securitized and guaranteed by the company covers loans 60+ days delinquent, including those in foreclosure, and does not include real estate owned (REO) in either the numerator or the denominator. Freddie Mac notes that their delinquency rate “[e]xcludes mortgage loans whose original contractual terms have been modified under an agreement with the borrower as long as the borrower complies with the modified contractual terms.” As an example, after Hurricane Katrina, Freddie Mac modified a number of loans affected by the storms. In May 2010, Freddie Mac returned to reporting multifamily delinquencies as those loans 60+ days delinquent.

FDIC-insured Banks & Thrifts

Source: Federal Deposit Insurance Corporation

The delinquency rate for FDIC banks and thrifts covers loans 90+ days delinquent, including those in foreclosure and in non-accrual status, and does not include real estate owned (REO) in either the numerator or the denominator. The universe of loans covered by this series also includes a large number of “owner-occupied” commercial loans – loans supported by the income of the resident business rather than by rent and lease payments. In a 2007 analysis by MBA of the ten banks with the largest commercial mortgage portfolios, approximately half, in dollar volume, of their commercial (non-multifamily) loan portfolio was comprised of these “owner-occupied” properties.

Data are available for life companies, FDIC-insured banks and thrifts, Fannie Mae and Freddie Mac since 1990 and CMBS since 1997.

3/17/2021

MBA Releases 2020 Rankings of Commercial/Multifamily Mortgage Firms' Origination Volumes

MBA's Commercial Real Estate/Multifamily Finance Firms - Annual Origination Volumes report is the only one of its kind to present a comprehensive set of listings of 141 different commercial/multifamily mortgage originators, their 2020 volumes, and the different roles they play. The report presents origination volumes in more than 140 categories, including by role, by investor group, by property type, by financing structure type, and by the location of the originating office.

3/16/2021

Commercial/Multifamily Mortgage Debt Increased 5.8 Percent in the Fourth Quarter of 2020

The level of commercial/multifamily mortgage debt outstanding at the end of 2020 was \$212 billion (5.8 percent) higher than at the end of 2019, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Mortgage Debt Outstanding quarterly report.

3/4/2021

Commercial and Multifamily Mortgage Delinquency Rates Continue to Vary by Property Types and Capital Sources

According to two reports released today by the Mortgage Bankers Association (MBA), delinquency rates for mortgages backed by commercial and multifamily properties decreased in February, as the COVID-19 pandemic's impact on commercial and multifamily mortgage performance continues to vary by the different types of commercial real estate.

2/10/2021

MBA Releases 2020 Year-End Commercial/Multifamily Servicer Rankings

The Mortgage Bankers Association (MBA) today released its year-end ranking of commercial and multifamily mortgage servicers' volumes as of December 31, 2020.

*2/9/2021***Commercial and Multifamily Mortgage Maturity Volumes to Increase 36 Percent in 2021**

\$222.5 billion of the \$2.3 trillion (10 percent) of outstanding commercial and multifamily mortgages held by non-bank lenders and investors will mature in 2021, a 36 percent increase from the \$163.2 billion that matured in 2020. That is according to today's annual release of the Mortgage Bankers Association's Commercial Real Estate/Multifamily Survey of Loan Maturity Volumes.

*2/9/2021***MBA Forecast: Commercial/Multifamily Lending to Increase 11 Percent to \$486 Billion in 2021**

Commercial and multifamily mortgage bankers are expected to close \$486 billion of loans backed by income-producing properties in 2021, an 11 percent increase from 2020's estimated volume of \$440 billion, according to a new forecast released today by the Mortgage Bankers Association (MBA).

*2/8/2021***Commercial/Multifamily Borrowing Falls 18 Percent in the Fourth Quarter of 2020**

Commercial and multifamily mortgage loan originations were 18 percent lower in the fourth quarter of 2020 compared to a year ago, and increased 76 percent from the third quarter of 2020, according to the Mortgage Bankers Association's (MBA) Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations.

*2/2/2021***Commercial and Multifamily Mortgage Delinquencies Decreased in January**

Delinquency rates for mortgages backed by commercial and multifamily properties decreased in January, according to the Mortgage Bankers Association's (MBA) latest monthly MBA CREF Loan Performance Survey. The survey was developed to better understand the ways the COVID-19 pandemic is impacting commercial mortgage loan performance.

*1/8/2021***Commercial and Multifamily Mortgage Delinquencies Rise in December**

Delinquency rates for mortgages backed by commercial and multifamily properties increased for the second month in a row in December, according to the Mortgage Bankers Association's (MBA) latest monthly MBA CREF Loan Performance Survey. The survey was developed to better understand the ways the pandemic is impacting commercial mortgage loan performance.

*12/15/2020***Commercial/Multifamily Mortgage Debt Increased 1.5 Percent in the Third Quarter of 2020**

The level of commercial/multifamily mortgage debt outstanding rose by \$57.0 billion (1.5 percent) in the third quarter of 2020, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Mortgage Debt Outstanding quarterly report.

*12/10/2020***Commercial and Multifamily Mortgage Delinquency Rates Continue to Vary by Property Types and Capital Sources**

Commercial and multifamily mortgage performance remains mixed, revealing the various impacts the COVID-19 pandemic has had on different types of commercial real estate, according to two reports released today by the Mortgage Bankers Association (MBA).

*11/5/2020***MBA Forecast: Commercial/Multifamily Lending to Fall 34 Percent in 2020**

Commercial and multifamily mortgage bankers are expected to close \$395 billion of loans backed by income-producing properties in 2020, a 34 percent decline from 2019's record volume of \$601 billion, according to a new forecast released today by the Mortgage Bankers Association (MBA).

*11/3/2020***Commercial/Multifamily Borrowing Falls 47 Percent in the Third Quarter of 2020**

Commercial and multifamily mortgage loan originations were 47 percent lower in the third quarter compared to a year ago, and increased 12 percent from the second quarter of 2020, according to the Mortgage Bankers Association's (MBA) Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations.

*11/2/2020***Commercial and Multifamily Mortgage Delinquencies Decline in October**

Delinquency rates for mortgages backed by commercial and multifamily properties declined in October, according to the Mortgage Bankers Association's (MBA) latest monthly MBA CREF Loan Performance Survey. The survey was developed to better understand the ways the pandemic is - and is not - impacting commercial mortgage loan performance.

*10/1/2020***Commercial and Multifamily Mortgage Delinquencies Decrease in September**

Delinquency rates for mortgages backed by commercial and multifamily properties declined in September, according to the Mortgage Bankers Association's (MBA) latest monthly MBA CREF Loan Performance Survey. The survey was developed to better understand the ways the pandemic is - and is not - impacting commercial mortgage loan performance.

*9/28/2020***Commercial/Multifamily Mortgage Debt Continued Rise in the Second Quarter of 2020**

The level of commercial/multifamily mortgage debt outstanding rose by \$43.6 billion (1.2 percent) in the second quarter of 2020, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Mortgage Debt Outstanding quarterly report.

*9/1/2020***Commercial and Multifamily Mortgage Delinquency Rates Affected by the Pandemic, but Impact Differs by Property Types**

Delinquency rates of mortgages backed by commercial and multifamily properties reveal the various impacts the COVID-19 pandemic has had on different types of commercial real estate, according to two reports released jointly today by the Mortgage Bankers Association (MBA).

*8/10/2020***Commercial/Multifamily Borrowing Falls 48 Percent in the Second Quarter of 2020**

Commercial and multifamily mortgage loan originations were 48 percent lower in the second quarter compared to a year ago, and declined 31 percent from the first quarter of 2020, according to the Mortgage Bankers Association's (MBA) Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations.

*7/30/2020***Multifamily Lending Increased 7 Percent to New Record High in 2019**

Fueled by strong market fundamentals and low interest rates, 2,589 different multifamily lenders provided a total of \$364.4 billion in new mortgages in 2019 for apartment buildings with five or more units, according to the Mortgage Bankers Association's (MBA) annual report of the multifamily lending market.

*7/16/2020***COVID-19 Pandemic to Cause Pullback in Commercial/Multifamily Lending in 2020**

Commercial and multifamily mortgage bankers are expected to close \$248 billion of loans backed by income-producing properties in 2020, a 59 percent decline from 2019's record volume of \$601 billion, according to a new forecast released today by the Mortgage Bankers Association (MBA).

*6/30/2020***Commercial/Multifamily Mortgage Debt Increased 1.7 Percent in the First Quarter of 2020**

The level of commercial/multifamily mortgage debt outstanding rose by \$61.0 billion (1.7 percent) in the first quarter of 2020, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Mortgage Debt Outstanding quarterly report.

*6/18/2020***Commercial and Multifamily Mortgage Delinquencies Remained Low in the First Quarter of 2020**

Commercial and multifamily mortgage delinquencies remained low at the end of the first quarter of 2020, according to the Mortgage Bankers Association's (MBA) latest Commercial/Multifamily Delinquency Report.

*5/7/2020***Commercial/Multifamily Borrowing Declines 2 Percent in the First Quarter of 2020**

Commercial and multifamily mortgage loan originations decreased 2 percent in the first quarter of 2020 compared to the same period last year, according to the Mortgage Bankers Association's (MBA) Quarterly Survey of Commercial/Multifamily Mortgage Bankers Originations. In line with seasonality trends, originations the first three months of the year were 40 percent lower than the fourth quarter of 2019.

*4/15/2020***Commercial/Multifamily Originations Rose to Record \$600.6 Billion in 2019**

Commercial and multifamily mortgage bankers closed a record \$600.6 billion of loans in 2019, according to the Mortgage Bankers Association's (MBA) 2019 Commercial Real Estate/Multifamily Finance Annual Origination Volume Summation.

*4/2/2020***MBA Releases 2019 Rankings of Commercial/Multifamily Mortgage Firms' Origination Volumes**

According to a set of commercial/multifamily real estate finance league tables prepared by the Mortgage Bankers Association (MBA), the following firms were the top commercial/multifamily mortgage originators in 2019
