Range Overview

A woman with blonde hair, wearing glasses and a dark jacket, is shown in profile, smiling and pointing her finger at a digital display. The background is blurred, suggesting an office or meeting environment. The lighting is soft, with a warm glow from the display and a cooler blue light from the background.

Introduction

The Ricoh Collaboration Boards enable teams to reinvent the way they work together.

Whether at the office, on the road or from home, they make it easy to join and contribute to meetings and brainstorming.

There is a Ricoh Collaboration Board for every meeting space.

They are scaled to meet the requirements of small, medium and large-sized meeting rooms. From our versatile 32", perfect for huddle spaces, and as interactive table or digital signage touch display, through to our extra-large 86" model, which is designed for large meeting rooms and conferences, we offer a choice of room-sized solutions.

Transform the way you work with the range of Ricoh Collaboration Boards

Work effectively, run more
productive meetings
and deliver engaging presentations
with Ricoh Collaboration Boards.

Discover one-stop collaboration hub

It is a simple choice. Ricoh's integrated all-in-one solution with its high resolution screen, built-in speakers and microphone is easier to set up and use than a multi-component system.

- Solutions for small, medium and large-sized meeting rooms
- 4K display in choice of screen sizes
- Ready for any videoconference end points and built in speakers and microphone enabling virtual meetings
- Easy operation and uniform approach make it simple for employees to use
- Supports UCS, UCS Advanced, Crestron and Skype for Business

Engage easily with remote sites

Ricoh allows people working at different locations to communicate and collaborate as though they are sitting in the same meeting room.

- Speed up decision making processes and improve business agility
- Collaborate with colleagues, partners and customers based in different sites and countries
- Simultaneously share and annotate content across multiple screens
- Connect up to 20 Ricoh Collaboration Boards via the intranet
- Reduce travel expenditure, improve employee productivity and cut carbon emissions

Use precise finger-tip control

Ricoh's 20-point multi-touch display allows plans, drawings, site maps and other documents to be annotated and shared as searchable documents.

- Supports multi-touch control using finger-tip and touch pens
- Draw and annotate in 20 colours and 4 thicknesses
- Touch screen allows presenters to focus on their delivery
- Hand-written notes can be saved as searchable OCR content
- Save, print and email documents directly

Set up and go

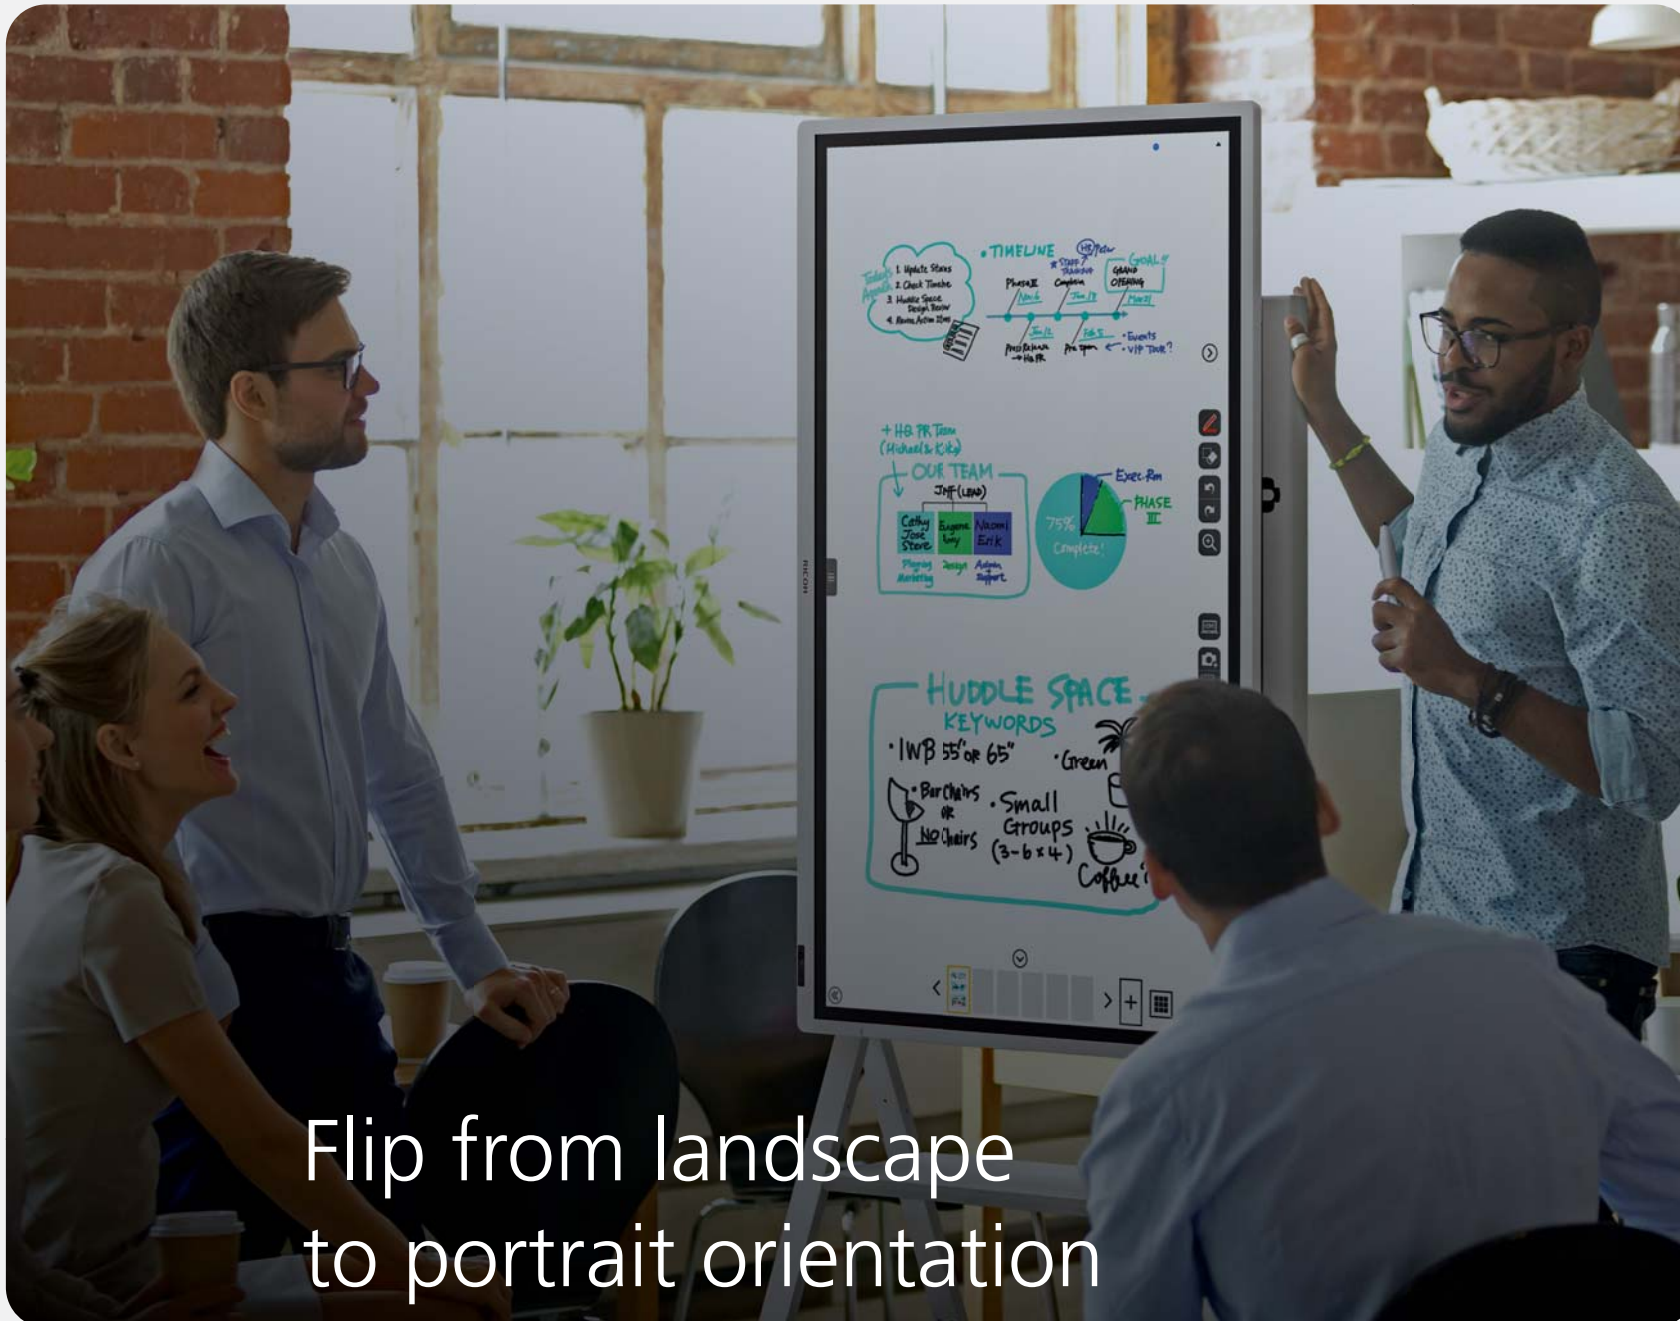

Employees will engage with our simple technology. Ricoh Collaboration Boards are easy to set up and use: simply connect a PC, tablet or smart phone and start working.

- There is no need to install software or calibrate the screen
- High-definition display provides a truly immersive experience
- Simply connect a PC, tablet or smartphone and start working
- Wireless connectivity means Ricoh can be moved from room to room
- With USB and video inputs, it is easy to share external content
- Share documents, present slides and browse the web

Secure your data

To safeguard commercial integrity, the Ricoh CBs support Streamline NX®, thus documents can be printed or emailed securely.

- Protect confidential information and safeguard commercial integrity
- Same secure card-based authentication system as Ricoh Printers
- Documents can only be printed or emailed by the initiator
- Screen content is automatically erased upon exit

Ricoh D3210

Maximise small space potential with multiple high spec technology.

The Ricoh Collaboration Board D3210 is ideal for smaller meeting spaces. Designed to facilitate communication, stimulate thinking and boost productivity, the D3210 is powerfully versatile and can be dynamically oriented, making it the ideal solution for the "huddle space" market, estate agencies, car dealerships, architects and designers - to give just a few examples.

- Perfect for multiple huddle space uses
- Easy to use with an intuitive UI – just plug in, switch on and connect
- Unique flip feature for table top interaction (only for Ricoh Standard Controller)
- Compatible with Ricoh Standard and Smart Controllers to customise functionality
- Unique versatile mounting options – vertical or flat, plus 180° touch screen rotation
- Stylish design in white and black (2 colours available)

Ricoh D8600

Higher resolution. Bigger screen.
Greater interactivity.

The Ricoh D8600 has the superior clarity that commands attention and accelerated understanding. Beautifully crafted, easy to use and packed with high spec functionality, this dynamic display panel is the one-stop solution for larger spaces. ShadowSense™ 2nd generation and touch pen provide more accurate and smooth writing experience. With connection box available as an option, D8600 can host the card reader and expand USB ports in front of the panel. Design has been improved with hidden cables and capture board can be embedded into the display.

- High spec, 4K display with shadow sensing for more accurate imaging and multi-touch sensing
- Large 86" display ideal for boardrooms, conference rooms, auditoriums, seminar spaces and exhibition zones
- User-friendly interface for easy operation
- Excellent writing performance via finger or touch pen
- One-stop collaboration hub with document annotation and real-time remote collaboration

Some features are supported by Ricoh Standard Controllers only

Ricoh Controllers

All models D3210, D5530, D6520, D7510 and D8600 allow you to choose between different options of controllers to assure your Ricoh supports all of your needs:

Ricoh Smart Controller

Equipped with a Smart Controller supporting Microsoft Windows®10, Ricoh's Collaboration Boards can host a number of applications, allowing people to conduct effective meetings and briefing sessions.

Ricoh Standard Controller

Ricoh Standard Controller is preconfigured for you and offers a simple user interface and tools for sharing, editing and saving collaborative projects. It comes ready to use: one touch on the screen and you can start collaborating.

Product Highlights

- Microsoft Windows®10 pre-installed
- Microsoft Windows®10 license included
- Supports all Windows® applications
- Easy to manage via any launcher application
- Fully customisable for business applications and corporate settings
- Allows configuration to meet specific security requirements

Product Highlights

- Turn it on and it is ready to use
- No display calibration or software configuration required
- Saves hand-written notes as searchable OCR content
- Network access secured by PIN code
- Multi-touch control using finger-tip and electronic pens
- On-screen content automatically erased on exit

Please note

Features and services described in this document (like OCR, e-mail functionality, SLNX and others) may vary depending on the type of controller installed. Some applications described, like UCS Advanced and Skype for Business may require installation of additional software. Electronic pen is supported only by Standard Controller. Capture board is supported and bundled only with Standard Controller.
