

REVOLUTIONARY REVEOS.

Transforming the way whole blood is processed in today's labs.

Introducing the **Reveos® Automated Blood Processing System**.
Now it's possible to improve your lab's efficiency, blood component
quality and process control with one platform.¹

The Reveos system:

Reveos device
TOMEs (Terumo Operational Medical
Equipment Software)
Cadence® Data Collection System
Reveos Blood Bag Set
Reveos Platelet Pooling Set

**THE FUTURE
OF WHOLE BLOOD
AUTOMATION
IS HERE.**

Will you lead or follow?

LEAD WITH REVEOS. REVOLUTIONARY BY DESIGN.

The Reveos system* processes **4 whole blood units** into **3 components** — **platelets, plasma and red blood cell (RBC) concentrates** — in a single centrifugation cycle.²

Reveos is transforming the way whole blood is processed in today's labs.

Quality

Optimizing whole blood processing with standardization and traceability, improved quality of blood components and improved procedural accuracy compared with the semi-automated buffy coat method.³

Confidence

Allowing you to focus on other areas within the blood center, knowing your whole blood process is under control.

Productivity

Minimizing work complexity and manual repetition, leading to increased staff satisfaction while improving lab performance and operator productivity.⁴

Flexibility

Allowing blood centers to adapt to an ever-changing environment and hospital needs.⁵
