

Impact of COVID-19 on Global Supply Chains

Our brief visual guide features the survey conducted during a Thomson Reuters webinar that was held across Europe, Middle East, Africa & Asia. This explored the state of business readiness in these markets to tackle the outbreak, focusing on the areas that were impacted the most, as well as the potential value that technology can offer corporate organizations in the coming months.

How disruptive was COVID-19 outbreak on your supply chain?

What has had the biggest impact on your supply chain since the COVID-19 outbreak?

Did your business have a plan to mitigate COVID-19 related supply disruptions?

Was your business prepared to meet unforeseen circumstances, like COVID-19?

Do you foresee nationalism on supply chain rising?

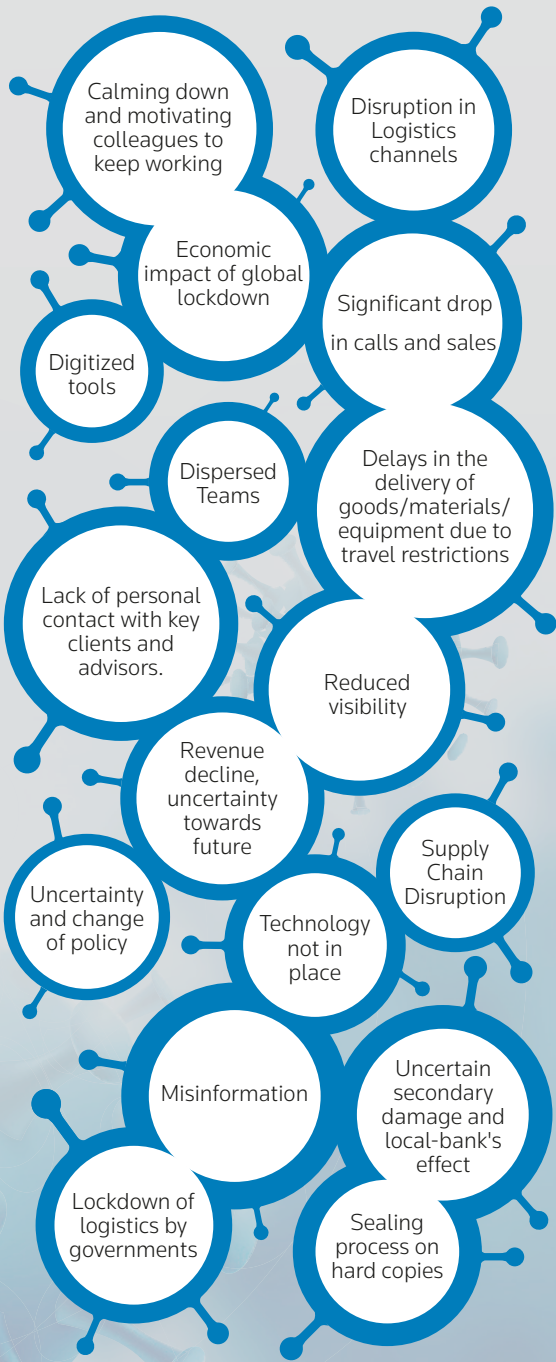

Do you currently leverage technology to change your supply chain design/flow?

Do you see your business turning towards technology to improve supply chain visibility and manage future disruptions effectively?

Describe your biggest pain point you faced in managing a situation like COVID-19?

In times like these, Thomson Reuters is here to help.
